WHY IS MOSQUITO ABATEMENT IMPORTANT?

- PROTECTING AMERICA'S FARMLAND FROM MOSQUITOES AND MOSQUITO-BORNE DISEASE IS CRUCIAL TO ENSURING THE CONTINUITY OF AN ABUNDANT, SAFE AND AFFORDABLE FOOD CHAIN.
- MOSQUITOES ARE ATTRACTED TO WARM-BLOODED CREATURES THAT EXHALE CARBON DIOXIDE
 - INCLUDING HUMANS, COWS, HORSES, GOATS, PIGS, ETC.
- ANIMALS THAT ARE CONTINUOUSLY PESTERED BY MOSQUITOES:
 - WILL NOT FEED PROPERLY AND SUFFER WEIGHT LOSS
 - MAY PROVIDE LESS MILK (COWS, GOATS)
 - BITES CAN CAUSE MAJOR ECONOMIC LOSS TO PIG FARMERS
 - CAN CAUSE WEST NILE OR EQUINE ENCEPHALITIS IN HORSES
