About Aeronet Communications

Aeronet was founded in 1995 from a vision of the Internet as a new means for organizations and individuals to learn, grow and prosper. From that vision, we have created a company uniquely equipped to assist our clients to thrive in this online medium.

We have specialized in highly custom, database-driven websites since the late 1990's. Most of these projects have involved membership organizations or educational institutions.

In 2017, Aeronet Communications was named Industry Partner of the Year by the California Society of Association Executives (CalSAE). This year, Ben Fajen is a member of the board of directors for CalSAE.

Aeronet Team

Ben Fajen, President

A former licensed architect with a degree from Cal Poly, San Luis Obispo, Ben has worked in many areas involving design, technology and communication. As Aeronet's founder, Ben plays an important role in the direction of all areas of the company, including website architecture, content strategy, database design and programming. Ben is President of the Board of Directors and one of Aeronet's owners.

Sergio Teixeira, Director of Database Technology

Sergio has over 25 years of programming experience. Sergio's depth of technical knowledge has broadened Aeronet's ability to meet a wide range of customer needs in areas such as electronic commerce and conference registration/management. Prior to working on Web-related projects, Sergio developed database-driven applications used to monitor and control airport traffic and underground metro traffic within the city of Sao Paulo, Brazil. Sergio is a member of the Board of Directors and one of Aeronet's owners.

Julio Farias, Front End Design and Programming

Julio works to ensure that the design of our client websites is compelling, customized to meet each client's target market, and fits well into any existing brand strategy. Julio is also an expert Drupal and WordPress site builder, excelling in making websites mobile compatible using Responsive layout techniques. Julio's capabilities with jquery, javascript, css, and other UX tools enable the sites we build to function just as well on the front end as they do on the back end. Julio has over 12 years experience in web development and has worked for Aeronet for six years.

Leonardo da Silva Calado, Lead Developer

Leonardo joined Aeronet to increase our ability to integrate cutting edge technology into our websites. Leonardo works with our project manager to translate design and functional requirements into the final, working website system. Leonardo's expertise spans a wide spectrum, including javascript, jQuery, PHP, database, custom Drupal module development, WordPress plugin development and e-commerce. Leonardo has nearly 20 years experience working in all areas of website development and has worked for Aeronet for 15 years.

Angelo Queiroz, Developer

Angelo brings a wide range of experiences to his work at Aeronet and is a Drupal and WordPress expert. Angelo works with our project manager to translate design and functional requirements into the final, working website system. Angelo has 12 years experience working in many technical areas of website development.
