Virtual Meeting Solutions

Desktops mobile interface

Eventpedia app offers a desktop version for attendees to access from their computer.

Through this user interface, attendees can join virtual sessions and chat with exhibitors without using any 3rd party virtual tools

Virtual Sessions

App user can join a virtual session from the app and the computer in a webinar format. Presenter can deliver and record presentation materials, ask audience for a vote and a chat window for attendees to ask/share questions.

Exhibitor - Attendee Chat

Through Eventpedia app, attendees can see exhibitor booth media files, and launch a one-on-one video chat with the booth personnel

Leadpedia

Lead Capture App

Leadpedia provides a quick and easy way for exhibitors to capture the attendee information by scanning the attendee badge.

Leadpedia is fully integrated with Eventpedia so exhibitors and attendees can easily maintain and share information.

-
- Apple and Android native apps
 - Set up app information from web portal
 - Scan attendee badge
 - Make voice and text notes about attendees
 - Mark attendee interested products and services
 - Record post show actions
 - Download scanned leads from web portal
-

System Integrations

Building integrations between systems to save time, increase accuracy and productivity.

Avodigy provides technology solutions to associations and non-profit organizations since its inception. Associations have used multiple systems to meet the specific needs of their business requirement. Some associations use an association management system, learning system, accounting software to event registration system, email platform, content management system, associations need to enable the systems to integrate to save time and provide efficiency and accuracy.

Throughout the years, Avodigy has developed integrations between major systems that are used by associations. If there are APIs or web services available, we will be able to build integrations to connect the systems for our customers.
