| STRENGTH | ABC | Cardinal | McKesson | Morris Dickson |
|------------------|----------|----------|----------|----------------|
| 250 mg per 50 mL | 10235681 | 5642178 | 1536945 | 902866 |

Benefits of the Premix, Ready-to-Use Bivalirudin:

- Standardized dose of 250 mg per 50 mL
- Does NOT require admixture
- Saves valuable time and steps
- Lyophilized Bivalirudin takes several steps to admix (per package insert)
- Bolus dose can be drawn directly from the RTU vial and the remaining dose hung for the patient
- Ready-to-administer products are recommended by ASHP*
- Can help to reduce the risk of medication errors
- Features AccuraSEESM Packaging and Labeling
- Vial is pre-labeled and ready to use, unlike an admixed bag
- IV hanger is built directly into the vial label
- Label is printed in both directions so you can read it on the shelf or hanging on an IV pole
- Athenex is the only company with a premix, RTU vial

**Whenever possible, medications should be available for inpatient use in unit-of-use and ready-to-administer packaging without further manipulation by the person administering the medication. ASHP Guidelines on Preventing Medication Errors in Hospitals; November, 2017.¹*
