

AMERICAN REGENT™

PRODUCT CATALOG

WHO WE ARE

American made and delivered.

For over 50 years, American Regent has set a higher standard for responsiveness and reliability as a U.S. based manufacturer of sterile injectables.

In 2018, more than 99% of units manufactured by American Regent were manufactured in America, with the remaining unit volume coming from Canada and France. In addition, the majority of our active pharmaceutical ingredients and product components are sourced from the US. What that means for you is a flexible, fast-moving partner. One that is uniquely positioned to mobilize resources or change production scheduling to quickly respond to help mitigate shortages or meet changes in market needs. A partner committed to delivering essential medications that are hard to find.

Over the next three to five years, we are investing \$200 million in the modernization and expansion of our manufacturing sites. These enhancements will allow us to significantly increase output while creating redundancies across our three manufacturing sites.

Speed counts. Flexibility matters. Quality and reliability are paramount. Because patients should never have to wait for the medications they need.
