

NRx® Pharmacy Management System for Outpatient Pharmacies

You're looking at ways to bring value to your health system and adapt to pharmacy's expanding role. QS/1's NRx and ShipRx® are perfect for outpatient and employee pharmacies. Use them to:

- Increase revenue
- Reduce readmissions
- Provide payroll deduction for staff
- Control pharmacy benefit costs
- Expand population health management programs

Meds-to-Beds and Clinical Services with NRx

Designed with decades of experience, NRx can do it all – from meds-to-beds programs and 340B to services for specialty dispensing. Enjoy flexible workflow, efficient claims processing, and comprehensive reporting. Hundreds of interfaces include:

- eHRs
- Automated dispensing
- Document management
- Compliance packaging
- Business intelligence with Mevesi®

Prescription Shipping and Employee Pharmacies with ShipRx

ShipRx is ideal for pharmacies that ship prescriptions, but it also streamlines employee payroll deduction. Combined with our POS system and shipping interface, it provides an efficient way to:

- Organize and manage multiple patient credit cards and delivery addresses
- Monitor payroll balances and manage family accounts
- Manage accounts receivable, advanced security, signature capture, and much more.

Remote Checkout®

- Bring prescriptions and counseling right to the patient's bedside
- Increase medication adherence
- Reduce costly readmissions

Point-of-Sale (POS)

- Streamline operations through integration with our pharmacy systems
- Tighten inventory management
- Eliminate redundancies and drive revenue

340B

- Simplify 340B by eliminating additional inventory
- Save by borrowing and replacing drugs electronically from a single inventory
- Meet FQHC and auditor requirements with customizable reporting

Interactive Voice Response (IVR)

- Make refill requests and patient reminders easier with an automated phone system
- Boost productivity and cut phone calls
- Improve patient medication adherence

SystemOne® for HME/DME

- Track both rental and sales inventory
- Use one system to manage delivery, billing, and Medicare Part B compliance documentation
- Share patient and physician demographic data by integrating with QS/1's pharmacy systems and Point-of-Sale (POS)

Convenience Tools

- **mobileRx®** app allows patients to order refills any time on their mobile device
- **Text and email** notifications provide easy reminders to patients about refills
- **RetrieveRx®** will-call system organizes prescriptions for quick, easy retrieval
