# SUPPORTING AMGEN'S MISSION TO SERVE PATIENTS THROUGH COLLABORATION

## Expertise in Core Areas Enables Focus Beyond the Molecule

## 6 Therapeutic Areas of Focus

### Bone Health

**Utilization of machine learning:**

- Applying machine learning techniques to identify previously undiagnosed fractures

### Cardiovascular

**IDN population health management:**

- Using IDN-level data to identify gaps in cholesterol management for very high-risk patients and empowering the IDN to manage LDL-C levels for the appropriate patient population

**Stakeholder collaboration:**

- Working with stakeholders to help improve patient engagement and care coordination across the continuum of care for patients with heart failure

Contact your Amgen Account Manager for more information on potential ways to collaborate.
