POWERING MEDICATION INTELLIGENCE™

[kitcheck.com](https://www.kitcheck.com)

ACCURACY. AGILITY. INNOVATION.

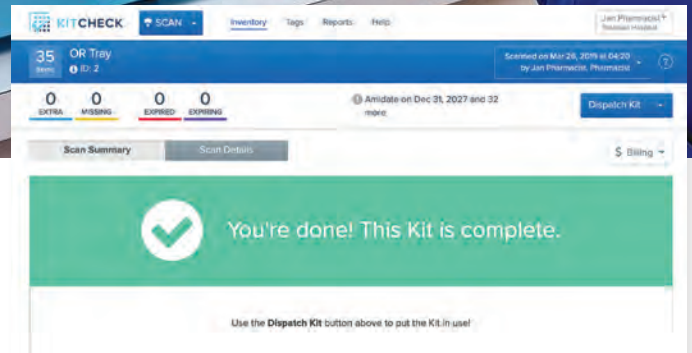

At Kit Check, our vision is to help you invest more time and resources in what's most important—patient care. When you partner with us, you'll lose the mountains of paperwork, ditch the tedious time-wasters and error-prone tasks and gain automated tracking and medication management insights that do the heavy lifting for you.

Kit Check is committed to not only evolving the technological fabric within the hospital pharmacy, but also to empowering your organization through Medication Intelligence™. Our solution-oriented products have worked for hundreds of hospitals across the country to solve their biggest obstacles.

After all, when we're talking about millions of dollars worth of inventory, and the time of your most expensive team members, it's important to be precise and agile. That's where we come in. We've helped hundreds of hospital pharmacies re-prioritize their needs and allocate their time better. Check out what Kit Check can do for you.

OVERVIEW OF INVENTORY MANAGEMENT

We didn't get to be the leading medication management solution system in the U.S. by accident. Our robust offering of solutions for managing kits, trays, anesthesia workstations, and crash carts are delivering incredible results day after day to over 450 leading hospitals across the United States.

Kit Check helps you free up time spent on operational tasks so you can reallocate resources toward improving patient care. Using industry leading RFID technologies, our inventory management solutions will help you cut time by up to 96%, eliminate errors, recommend agile solutions, and ultimately, add rocket fuel to your ROI.

“ It allows us to feel better at the end of the day when we know the kits are stocked accurately. ”

Nicole M. PharmD., Pharmacist

HERE'S A SAMPLE OF WHAT OUR SOLUTIONS CAN OFFER YOU

Kit Check has developed a suite of solutions for all of these areas and more commonly identified problems. We help our customers with regulatory compliance, improved ROI, overall staff morale, and so much more.

ADVANCED SEGMENT OPTIMIZATION

Transform kit and par level definition from an art into a science by leveraging our recommendations for optimizing your trays to reduce waste and costs.

EXPIRATION ANALYTICS

Eliminate waste and reduce costs by instantly identifying where you are losing inventory to expiration.

KITTED INVENTORY WITH COST

Say goodbye to allocating staff hours or hiring outside auditors to take stock of your kitted inventory. We give you an instant look at all your kitted drugs and the value of your inventory from any computer, any time.

RECALLS & SHORTAGES

Get a jump start on information and adjust plan accordingly. Recalled medications can be located in minutes rather than hours or days across all networked hospitals.

SHELF STOCK MANAGEMENT

Ditch the error-prone and time-consuming process that is often riddled with incorrect information. Receive automated stocking reports in a frequency that works with your existing process.

SYSTEM DASHBOARDS

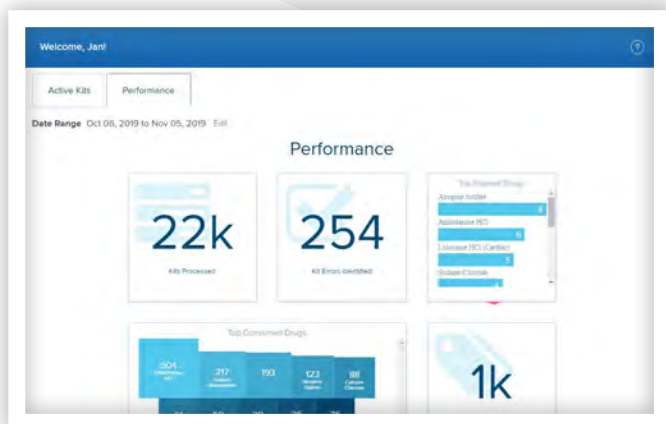

Integrate and compare inventory utilization between hospitals within your IDN. Gain instant access to statistics, data insights, and more with a user-friendly dashboard.

BENCHMARKING

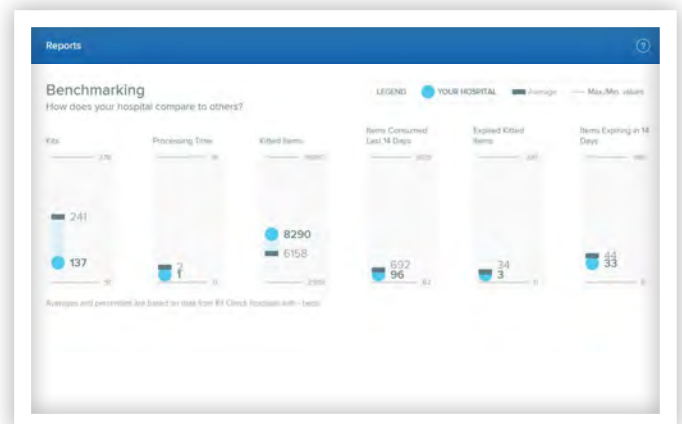

Assess your hospital's practices compared to others in the US healthcare market to identify areas of opportunity backed by real data.

ACTIVITY ANALYTICS

Standardize your best practices by gaining visibility into how your employees leverage Kit Check individually and as compared to their peers.

WHO WE HELP

- ✓ Pharmacy
- ✓ Compliance
- ✓ IDNs
- ✓ IT
- ✓ Administration

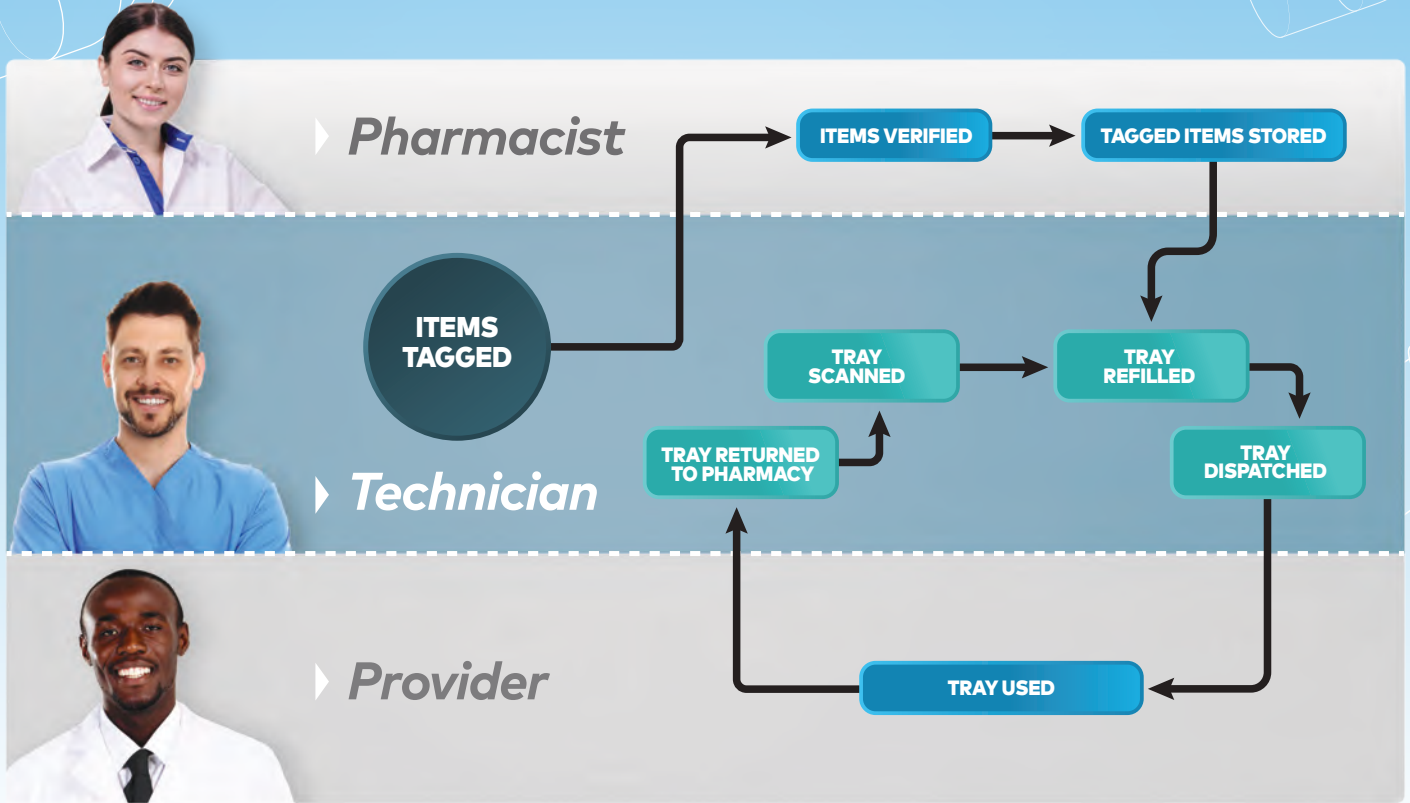

“ We are going to continue to use the analytics to look at all tray inventory. I think having the data is a great way to start the conversation about optimizing what truly needs to be in kits. ”

*Huzefa R., PharmD.,
OR Pharmacy Supervisor*

How It All Works

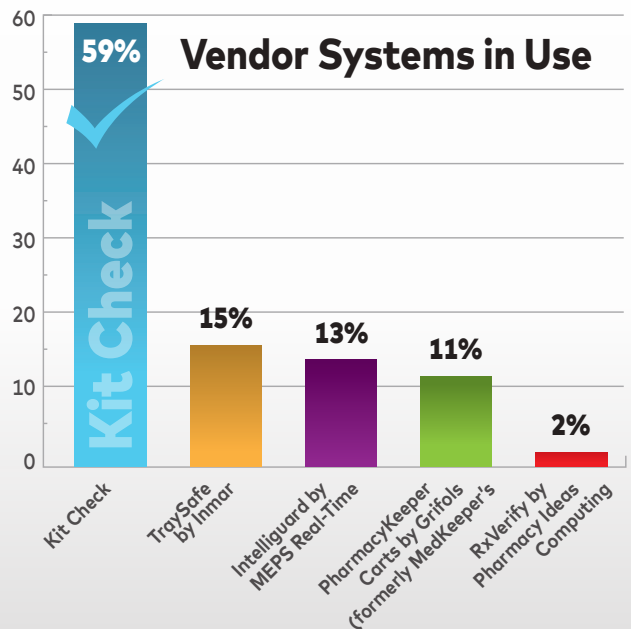

KIT CHECK WORKFLOW

“ Makes my job so much easier! I have worked in a hospital without Kit Check before, and it required a [full-time] technician to manually refill all the trays/boxes! To me, Kit Check is worth the expense, especially for the unusual amount of boxes this hospital's pharmacy has. ”

– Britney P., Pharmacy Technician

Kit Check is the industry's leading tray management system

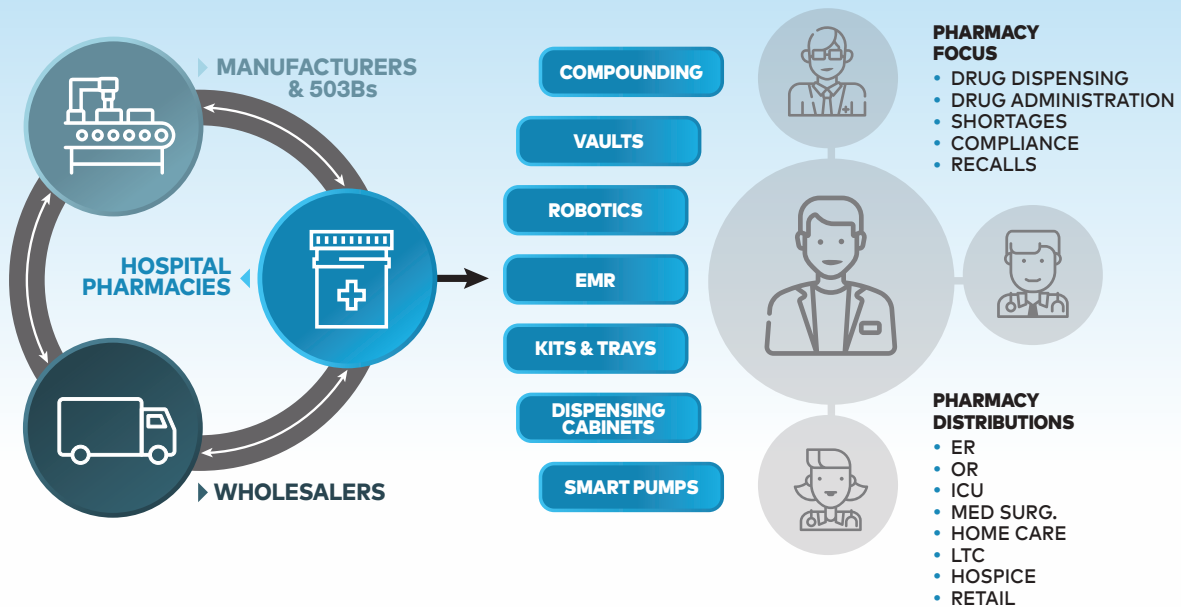

"Medication Tray Management," Pharmacy Purchasing and Products, State of Pharmacy Automation 2019, August 2019, pppmag.com. Accessed November 18 2019

THE EVOLVING PHARMACEUTICAL ECOSYSTEM

The last 30 years have brought innovative breakthroughs to pharmaceutical technology, resulting in more personalized care for patients with increased accuracy. However, these innovations have created additional operational complexity and new, time-consuming challenges for hospitals and their suppliers.

Healthcare leaders want a holistic system that unifies and harmonizes these innovations by coupling with their existing systems—without additional tasks or increased overhead.

At Kit Check, we've developed a software solution that provides cyclical connectivity and visibility across the entire pharmaceutical ecosystem—from the manufacturing facility, through our wholesale distributors, and into every aspect of the hospital pharmacy.

Ultimately, Kit Check provides benefits across the entire pharmaceutical ecosystem by providing product visibility at a granular, unit-of-use level. It enables downstream workflows and helps manage recalls, returns, expiry, and more. Our solution assures optimal tag performance within customer and partner applications and enables manufacturers, service providers, and technology vendors to differentiate their offerings with Kit Check's partners and community.

That's the power of Medication Intelligence™.

WORKS WITH KIT CHECK PARTNERS

About Kit Check

Kit Check was founded in 2011 to help hospital pharmacies gain more visibility into and control of medication management and distribution. Our core focus is on designing and developing tools that create and implement safer, more compliant, and more efficient processes in hospital pharmacies, with an overarching goal of helping hospitals better serve their patients and communities. Kit Check is committed to pushing the boundaries of technological innovations that power Medication Intelligence™
