

SPARx Turnkey Specialty Pharmacy Solutions

Realize your specialty pharmacy goals

Specialty Pharmacy

Specialty patient management powered by advanced software technology

In the era of value-based care, hospitals and health systems face a host of unique challenges. These include finding new sources of revenue, retaining and growing the patient base, driving access to limited distribution drugs (LDD) and continuing to improve patient care outcomes. Owning the specialty pharmacy allows for organizations to benefit from the additional revenues while improving care capabilities for patients.

SPARx delivers

- ✓ **STRATEGY** - We analyze opportunity, assess payer mix and 340B to craft a specialty pharmacy strategy.
- ✓ **DESIGN** - We create a facility plan converting the existing retail pharmacy or new build-out and oversee construction, pharmacy work flow, clinical programs and IT infrastructure.
- ✓ **OPERATIONS** - We review all specialty pharmacy functions, hire and train a team, integrate with the existing patient care team, create marketing solutions and provide patient care services.
- ✓ **GROWTH**
 - Accreditation** - We facilitate your ability to obtain dual accreditation and advise on your compliance matters within nine months of the go-live date.
 - Analytics** - We average our expertise and suite of proprietary analytics capabilities to continually assess the hospital opportunity and optimize the patient care regime.
 - Payer** - We provide intelligence regarding the specialty business while driving payer contracting solutions.
 - LDD** - We interact with drug manufacturers to obtain access.

“SPARx brings unmatched value and the ability to meet the unique needs of each of our clients. We are adding millions of dollars to our clients’ bottom lines each year.”
