

The Complete Solution For **GEMCITABINE BLADDER INSTILLATION**

**EDGE Pharma offers compounded
Gemcitabine Bladder Instillation Syringes**

Patent Pending

Our standard dosage available is 1g/50mL, and is dispensed in a pre-filled unit-dose Luer Lock syringe.

This solution solves the USP 800 hazardous compounding challenge many hospitals and clinics now face when offering Gemcitabine as a bladder instillation. **Since the product comes ready-to-administer, you do not need to compound a hazardous drug in your facility.**

Gemcitabine Bladder Instillation Syringes
