

Amazing Grace Pet Food, LLC

Our Company

We are a small, woman-owned company in Centreville, VA that cooks all natural, whole ingredient wet food for dogs and cats. Inspired by our owner's cat, Grace, we firmly believe that nutrition drives health. Our veterinarian-developed recipes are designed to serve pets' true nutritional needs by prioritizing protein and never using 4D meat.

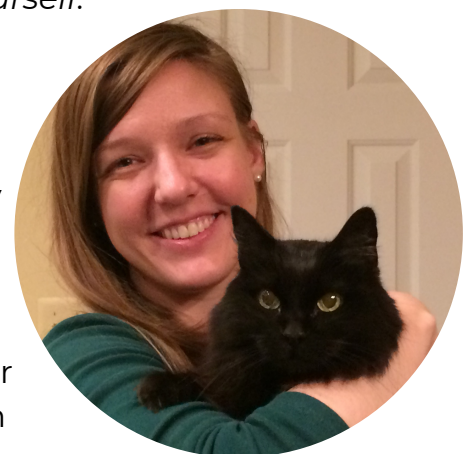

Our Food

We include everything pets need, and nothing they don't.

- ✓ **High in protein, low in carbs**
The opposite of most pet food- and the best for pet health! Pet food is often >50% carbs, which is linked to common chronic illnesses like allergies, diabetes, kidney disease, and cancer. We prioritize protein.
- ✓ **Plastic-free packaging**
Recyclable glass mason jars maintain the integrity of your pet's food and are eco-friendly.
- ✓ **No 4D meat**
Dead, Diseased, Dying, and Disabled (4D) animal matter is allowed in pet food. That means anything from roadkill to expired meat- even euthanized pets. Poor quality food means poor health, so we only use ingredients you could eat yourself.
- ✓ **Veterinarian-formulated**
Our recipes are developed to support pets' optimal health based on what they need to thrive- not what's cheapest to make.
- ✓ **Preservative-free**
Pressure canned for 12 month shelf life. Once open, refrigerate up to 1 week, or freeze up to 3 months.
- ✓ **Single source protein, no grains**
Great for sensitive stomachs, food allergies, and picky eaters.

Our Mission

Grace was a starving stray kitten found in the snow at Fort Belvoir in Virginia. Adopted and adored by my family in 2004, Grace lived a playful and energetic life until she passed due to cancer in 2019. Researching her diagnosis revealed the gap between pets' nutritional needs and standard pet food, inspiring Amazing Grace Pet Food. Our mission is to improve pet health through quality nutrition to help pets live their longest, healthiest lives.
