

# WOLF SPRING

## WHAT IS WOLF SPRING?

Wolf Spring is the first functional beverage for dogs (some call us the first Vitamin Water for dogs, but our water is much healthier!). Each of our formulas have been developed by vets and tailored for the specific stages of life: Puppy, Adult, and Senior. Given daily, Wolf Spring fills the most common gaps in dog nutrition such as, glucosamine, prebiotics, vitamins and helps our furry friends stay healthier for longer.

Our bottles are filled with limited all natural and plant-based (non-gmo) ingredients. Every ingredient in our bottle gives a clear benefit like, glucosamine for joints, inulin for digestion, coconut water for hydration, and more!

We have also developed a plant-based natural flavor to make sure that over 95% of the dogs devour our beverage as soon as it is poured in their bowl.

## WHO WE ARE

Wolf Spring started with two guys who really, really love dogs. They realized that the market for dog supplements was not very appealing, nor convenient for dog parents and that there had to be something better to take care of our dogs.

With professional backgrounds both in beverages and pets, the idea of the first functional beverage for dogs came quite naturally. Humans have all sorts of functional drinks to stay healthy, like kombucha and coconut water, why can't dogs get the benefit of these drinks as well? They teamed up with veterinarians and dog nutritionists to develop formulas which help dogs stay healthy and also have an amazing taste. Wolf Spring brings the ease and fun to health.

## KEY FEATURES

No Online 3rd Party Seller  
\$2.99 MAP guaranteed across channels

Independent Pet Retailers Only

Ambiant Product  
Refridgeration not needed

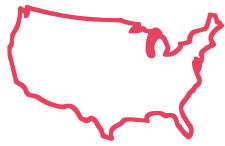

Shelf Life Over 1 Year

# OUR COMMITMENT

All Natural

Made in the USA  
FDA Approved Facility
