Hi-food Ottavi

Goldfish Flakes

- Code - OTMA013 / 100 ml, 20 gr
- Code - OTMA014 / 250 ml, 50 gr
- Code - OTMA015 / 1200 ml, 200 gr

Complete feed in flakes for common and rare carassius goldfish of aquarium.

This food ensures a balanced nutrition as it contains mineral salts, proteins, lipids, carbohydrates which are all necessary for the healthy growth of this species.

Goldfish Pellet

- Code - OTMA011 / 100 ml, 35 gr
- Code - OTMA012 / 250 ml, 100 gr

Complete feed in pellet for all ornamental medium size coldwater fish.

It is particularly suitable for all types of fancy coldwater fish including fantail varieties, shubunkins as well as the common varieties of goldfish, the granules are enriched with additives that enhance the splendid colour of your fish.

Color

- Code - OTMA011 / 250 ml, 50 gr

Complete feed in flakes for all kind of tropical aquarium fish.

It is enriched with Canthaxanthin, ingredients that enhance the natural colour of tropical fish.

Tropical

- Code - OTMA021 / 100 ml, 20 gr
- Code - OTMA022 / 250 ml, 50 gr
- Code - OTMA023 / 1200 ml, 200 gr

Complete feed in flakes for all kind of tropical aquarium fish.

The blend of different high quality ingredients makes this food essential for the healthy feeding of your tropical fish.

Granular

- Code - OTMA026 / 100 ml, 45 gr
- Code - OTMA027 / 250 ml, 120 gr

Complete feed in granules for fresh and marine water aquarium.

Cichlid Pellet

■ Code - OTMA024 / 250 ml, 50 gr

Complete feed in pellet formulated to satisfy nutritional requirements of cichlids.

Vegetal

■ Code - OTMA031 / 250 ml, 50 gr

Complete feed in flakes with a high-vegetable flour content formulated to satisfy nutritional requirements of freshwater herbivorous tropical fish.

Tablet

■ Code - OTMA028 / 100 ml, 60 gr

Complete feed in tablet for all bottom feeding fish, particularly suitable for Corydoras fish.

Gammarus

- Code - OTMA001 / 100 ml, 10 gr
- Code - OTMA002 / 250 ml, 31 gr
- Code - OTMA003 / 1200 ml, 120 gr

Feed material for the welfare of freshwater turtles.

Turtle Micro Pellet

- Code - OTMA006 / 250 ml, 75 gr
- Code - OTMA007 / 1200 ml, 350 gr

A complete feed in pellet for freshwater turtles of small size.

Turtle Pellet

- Code - OTMA006 / 250 ml, 75 gr
- Code - OTMA007 / 1200 ml, 350 gr

A complete feed in pellet for freshwater turtles.

Mix Fish + Shrimps

- Code - OTMA004 / 1200 ml, 200 gr

Complete feed for the welfare of freshwater turtles.

Gambero +

- Code - OTMA010 / 1200 ml, 150 gr

Feed material for the welfare of freshwater turtles of big size.

Filter Material

Vita-pur Mini

■ Code - OTMF004 / 200 gr

Filtering material in the form of cylinders for fresh and seawater aquariums.

Ottavi Vita-pur is able to retain the coarsest impurities present in the aquarium without hindering the passage of water. Ideal for the establishment of nitrifying bacterial flora thanks to the enormous porosity of the product.

Vita-pur

■ Code - OTMF006 / 600 gr

Filtering material in the form of cylinders for fresh and seawater aquariums.

Ottavi Vita-pur is able to retain the coarsest impurities present in the aquarium without hindering the passage of water. Ideal for the establishment of nitrifying bacterial flora thanks to the enormous porosity of the product.

Vita-pur +

■ Code - OTMF005 / 300 gr

Excellent filtering material made by sintered glass in the form of cylinders for fresh and sea water aquariums.

Ottavi Vita-pur + is able to retain the coarsest impurities in the aquarium without hindering the passage of water. Ideal for the establishment of nitrifying bacterial flora thanks to the enormous porosity of the product.

Iper-pur

■ Code - OTMF008 / 150 gr
5 single -dose bags

■ Code - OTMF009 / 300 gr

■ Code - OTMF010 / 300 gr
3 single -dose bags

■ Code - OTMF011 / 100 gr

Ottavi Iper-pur is a filter material based on hyperactive charbon in pellets. It is especially recommended for the obtaining of breeding water, for keeping particularly sensitive fish, for heavily populated aquariums or after treatment with medicines or additives.

Ottavi Iper-pur does not change the pH value of the water and is free from nitrates and phosphates. It is suitable for both freshwater and seawater aquariums.

Triki-filter

■ Code - OTMF013 / 300 gr

Created specifically for turtles, Ottavi Triki-filter is a mixture consisting of 70% zeolite and 30% hyperactive pellet charbon.

■ Zeolite is a natural granulate able to absorb numerous toxic substances including ammonia, responsible for the yellowing of water. Hyperactive charbon eliminates organic substances and drug residues, additives and feed.

Triki-zeo

■ Code - OTMF016 / 300 gr

Ottavi triki-zeo is a natural zeolite that has the property of absorbing numerous toxic substances (including heavy metals) and is suitable for all aquariums with an ammonia concentration that is too high in water. It is intended for freshwater and turtle tanks.

Fibra-pur

■ Code - OTMF001 / 100 gr
■ Code - OTMA002 / 250 gr

Ottavi Fibra-pur is a special synthetic fibre suitable for the mechanical filtration of aquariums.

■ Ottavi Fibra-pur has the peculiarity of being inert, absolutely non-toxic and neutral and therefore does not alter the pH of the water. It maintains its softness even during filtering. It is suitable for both freshwater and saltwater aquariums.

Water Treatments

Aqua-vit +

- Code - OTTR005 / 100 ml
- Code - OTTR006 / 250 ml

Ottavi aqua-vit + is able to immediately bind heavy metal ions, neutralising harmful substances in tap water. It also makes the water rich in all the substances necessary for the acclimatisation of plants and fish.

Ottavi aqua-vit + contains colloidal substances and synthetic polymers, for the mucosa of fish and for their digestive tract avoiding the risk of pathological phenonemes.

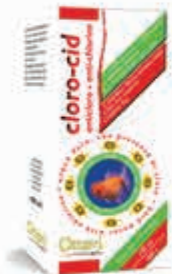

Bio-vit +

- Code - OTTR002 / 100 ml
- Code - OTTR003 / 250 ml

Ottavi bio-vit + is used to activate, maintain and increase the biological filtering potential in the aquarium, causing a synergistic activity between bacteria and enzymes.

The enzymes contained in Ottavi bio-vit + make a decisive contribution to strengthening the effect of the biological filtering mass, reducing its work.

Cloro-cid

- Code - OTFE001 / 100 ml

Ottavi cloro-cid is a water conditioner designed for the elimination of chlorine in freshwater aquariums.

Chlorine is a disinfectant substance present in tap water, but is dangerous for fish. When setting up the new aquarium, with partial changes of water, it is necessary to neutralise it quickly because it can cause serious irritation to the protective mucus of the fish.

Sea Salt

Tropical-reef

- Code - OTSA001 / 30 lts
- Code - OTSA002 / 60 lts
- Code - OTSA003 / 120 lts
- Code - OTSA004 / 20 Kg

Ottavi tropical-reef is a new-generation product consisting of pure and top quality substances. It helps to obtain in a few hours a suitable environment for fish and marine invertebrates, even the most delicate ones, such as crinoids.

The perfect blend of trace elements (68) salts and chelating substances, make Ottavi tropical-reef essential for setting up new tank.

Products for plants

Fondo-mix

- Code - OTFE003 / 1,8 Kg
- Code - OTFE004 / 3,2 Kg

Slow release natural bottom soil ideal for planted aquarium. Intended for freshwater aquariums, Ottavi Fondo Mix is essential in setting up new aquariums because it is rich in substances; in fact it consists of macro and micro elements, ideal for the development of flora in general. Ottavi fondo mix contains high levels of potassium and iron, essential for the correct functioning of plant enzymatic systems, traces of elements such as: potassium, calcium, nitrogen, phosphorus, cobalt, manganese, magnesium, etc.

Flora-vit +

- Code - OTFE001 / 100 ml
- Code - OTFE002 / 250 ml

Ottavi Flora-vit + is a solution of mineral salts for all freshwater aquatic flora. It consists of micro and macro elements such as iron, sodium, potassium, nickel and manganese that promote plant growth, revive leaf colour and perform an inhibitory action against filamentous algae.

Ottavi Flora-vit + is easily and quickly absorbed by both root and leaf apparatuses and is intended for freshwater aquariums.
