

# Quality Apex: A Scientific Crystal Ball

Imagine if you could determine what your 5-Star rates might be in advance of being publicly reported by CMS.

Quality Apex can help your community determine where your rates might be by calculating quality measure rates after every upload of MDS data providing an opportunity to effect change where needed in real time, throughout the quarter.

## QUALITY APEX

With Quality Apex there is no more waiting and wondering what your next 5-Star Rating will be!

For more information contact:  
Marguerite Carroll at [mcarroll@leadingagency.org](mailto:mcarroll@leadingagency.org)

“Quality Apex has provided us the ability to see the big picture by helping us quickly identify and predict Quality Measure outcomes before the CMS Five-Star ratings are published. The software has improved our MDS submission accuracy by alerting us to upload errors. The data is real-time and current.”
