

CONTACT TRACING SIMPLIFIED

Contagious infections need immediate action. Every minute counts when it comes to keeping your residents safe from infection. Traditional contact tracing eats into unbudgeted staff time to capture information from memories of residents and staff. Time spent interviewing and documenting resident, visitor and staff interactions is time that could be spent combating the spread of infection in your community.

There is a Better Way

INTEGRATED CONTACT TRACING TECHNOLOGY CAN HELP YOU BEAT THE SPREAD!

ENSURE360SM brings together traditional eCall and sensory technology with real time location services, contact tracing and case management to provide a robust solution that helps keep residents and staff safe and healthy.

Ensure360's sophisticated location services help you trace contacts, manage the cases and help administer infection procedures. Managing geofence parameters, isolation schedules and room occupancy limits is simplified. Dashboards let you see an overview of key information and drill down into the details.

BUILT-IN CAPABILITIES HELP YOU MANAGE AN INFECTION WITH CONFIDENCE

Contact tracing helps identify and manage residents

- Identify and prioritize individuals at risk quickly with actionable reporting
- Define geofences to protect isolation areas
- Manage isolation protocols and set room occupancy alerts

Case management helps administer infection procedures

- See a dashboard of your cases and drill down on resident or employee conditions
- Display disease summary including community cases, timelines, exposures, and protocols in place
- View positive cases and sort data by cases and exposure

INTEGRATED FOR INSIGHTS

Ensure360 captures thousands of data points on every resident every day. Combined with the data from the Sentricks360 suite, and third party solutions like your EMR, your staff will have a 360-degree view of your residents' activities and needs, and insights that help them anticipate and act before an adverse action occurs.

A SINGLE, INTEGRATED SOLUTION HELPS YOU MOVE FORWARD WITH CONFIDENCE

With Ensure360, you get the best of both worlds: Sophisticated eCall technology that helps keep your residents safe, and leading-edge contact tracing and case management powered by real time location services. It is the ultimate platform in keeping your residents and staff safe, healthy and happy.
