

RISK ANALYSIS NOW AVAILABLE IN QUALITY APEX!

One of the most important applications of a data analytic program is using it to perform predictive analytics and risk stratification.

Quality Apex has implemented the next phase that includes a predictive model for the following high value measures:

- Hospitalization
- Rehospitalization
- UTI
- Pressure Ulcers
- Falls with major injury

The benefits of identifying risk patterns are:

- Proactive management of residents instead of reactive
- Avoiding negative outcomes
- Implementation of preventative strategies
- Increasing resident and significant other satisfaction
- Provides evidence of person centered care
