

RED COAT

is The Bed Bug Answer!

Aprehend Bio-Pesticide

Description:

- Aprehend is a non-toxic bio-pesticide utilized as a preventative bed bug treatment
- It stops introductions from becoming infestations
- The product provides control for 90 days if left undisturbed
- There is no known resistance to the product for bed bugs
- Once contaminated with the product bed bugs will infect other insects in the harborage
- Each application takes about an hour to complete

Common Uses:

- Following a heat treatment to protect against re-infestation
- Proactive application to a group of at risk rooms
- Applied quarterly for best results

Preparation:

- Room should be straightened, cleared of trash
- All breathing apparatuses, such as CPAP or Oxygen, must be removed from treated areas
- Clothing should be hung or put away in drawers
- Food should be covered and/or placed in refrigerator
- Pets should be removed from the premises.
- Remove all sheets, covers, dust ruffles, comforters, pillows, and any other bedding covers from the mattress and box spring in all bedrooms
- Wash and dry linens on the hottest setting. Linens may be returned to the bed following the treatment.

Following the Treatment:

- Resident may re-enter the room 4 hours following the treatment
- Refrain from spraying any cleaning products on treated areas. Liquids will render the product ineffective.

Live Bed Bug Sightings:

- All bed bugs will die within 3-7 days after coming into contact with Aprehend.
- Affected bugs may be confused and seen wandering in unusual places. This is a sign that the treatment is working.
