## Senior Living

Occupied Renovations™ knows senior living facilities must join durability and safety requirements with an appropriate ambiance and a certain elegance. The design of the environment reveals a great deal about a facility to its potential customers, as well as the employees. Whether it's in a resident's individual unit, a high traffic corridor, or the dining room, quality finishes are an integral component of proper design and part of the strategy for creating superior experiences.

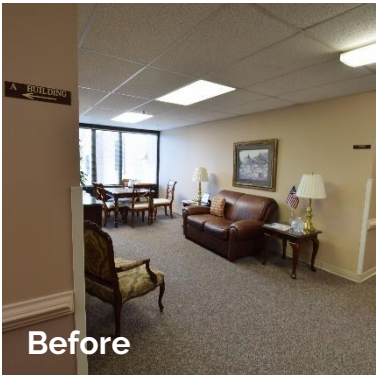

Whether your project calls for creating a senior community, continuing care, or assisted living, Occupied Renovations™ will design a solution that will meet the unique requirements of any facility.

# Occupied Renovations™ delivers the total turnkey interior renovation solution.

Occupied Renovations™ merges the typical services required for a commercial renovation, such as design, floor covering, furniture procurement, and wallcovering into one complete package. Our service includes all the necessary components for a complete facility facelift. This approach allows us to coordinate and execute entire renovation projects from start to finish.

## DESIGN

We have full time, licensed Interior Designers on staff to meet the needs of our clients. Our clients can be assured their projects will have the best products that meet their individual requirements.

## FLOORING

Our installations are tailored to be completed with minimal disruption to the daily business of our clients. Our patented lift system allows us to complete replacement projects faster and more cost effectively than other flooring contractors.

## PAINT & WALLCOVERING

Our services allow the walls of a space to be refinished with the other installation components of the project to further ensure minimal disruption to the business.

## MAINTENANCE SERVICES

A proactive maintenance program will guard against premature floor replacement, which is good for the environment and keeping unexpected costs at bay.
