

Senior Living

Project and Development Services

By 2030, all baby boomers will be older than age 65. Moreover, five years later in 2035, the 65+ population will outnumber the population under the age of 18 for the first time in U.S. history. The aging of the population will create significant demand for seniors housing. Senior Living encompasses a broad range of housing and care options. Today's retirees are seeking residences which embrace technology, an active lifestyle, hospitality, sustainable features and more.

As your Program/Project Manager, our goal is to help you and your organization achieve your broader business goals – to build better facilities that improve the experience for residents, all while achieving your real estate strategy.
