- Top Senior and Assisted Living Communities EHR Vendor
- Top Home Health EHR Vendor

About Netsmart

Netsmart designs, builds and delivers electronic health records (EHRs), health information exchanges (HIEs), analytics and telehealth solutions and services that are powerful, intuitive and easy-to-use. Our platform provides accurate, up-to-date information that is easily accessible to care team members in behavioral health, home care, senior living and social services. We make the complex simple and personalized so our clients can concentrate on what they do best: provide services and treatment that support person-centered care.

One Person | One View | Better Care

myUnity®

A unified enterprise EHR platform, myUnity facilitates concurrent admissions, enables access to schedules and automates referral management while giving providers a single view of one record, one care plan and one bill.

Instead of toggling between systems, everything is in one place. That way you can spend more time with the individuals in your care and less time on computers.

myUnity features:

- Creates a single record across all lines of business and care settings
- Automates common care processes and creates role-based workflows
- Creates a single bill across the care continuum that integrates with standard accounting systems

* Black Book Market Research LLC annually evaluates leading healthcare/medical software and service providers across 18 operational excellence key performance indicators completely from the perspective of the client experience. Independent and unbiased from vendors' influence, over 620,000 healthcare IT users are invited to contribute.
