

## Providing Value Beyond Medication.

PharMerica is the long-term care pharmacy service of choice for skilled nursing facilities across the country.

Whether you have one location or operate a chain of facilities across state lines, we understand that every customer is local. And we are, too. Face to face, where you live and operate, we're leveraging our organizational depth of expertise and resources to deliver the custom solutions and personalized service that will best meet your needs.

## Community Focus. National Expertise.

Our pharmacies are managed and operated by area residents who have access to the knowledge, tools and technology to act in the best interests of facilities locally. Armed with unmatched capabilities that are openly leveraged and shared, our service model empowers our pharmacies to deliver on our brand promise and provide:

- **Consistency:** A single, scalable platform, uniform implementations, and coordinated support at each touchpoint
- **Advocacy:** Empowered local operators with the local insights, autonomy, and flexibility to act
- **Personalized Service:** Micro-level knowledge and access for customized attention to your specific needs
- **Community Advancement:** Shared goals and a laser focus on building a stronger community by promoting the health and well-being of residents

Rather than a one-size-all approach, here's how we partner with each client to improve medication adherence, cost savings and regulatory compliance.
