

6-4-3 CHARTS

**POWERFUL INSIGHTS. INNOVATIVE DESIGNS.
UNMATCHED CUSTOMER SERVICE.**

THE 6-4-3 DIFFERENCE

- NEW user interface: allows us to integrate all of our product offerings and applications into a single user experience.
- NEW features include multiple standard report options, career report capabilities, on-demand report and stat book generation, enhanced web app and custom spray chart capabilities, and our first ever video pitch tracking application.
- Updated data **twice** weekly: we update data twice weekly, Sunday night, so you have the most available data at your disposal each Monday morning and by noon PST Thursday, so you have the most updated data heading into your weekend games.
- Best game data available: our data optimization process ensures we have the best possible data for all games and all teams.

OUR SCOUTING REPORTS & STAT BOOKS

- Generate the most detailed and comprehensive scouting reports available on the fly with the most updated data possible!
- Check out how easy it is with this short demo: [HOW TO GENERATE SCOUTING REPORTS](#).
- Our STAT BOOKS are Excel readouts with all data from our reports for you to sort, filter, export, and manipulate any way you want.
- Check out how easy it is with this short demo: [HOW TO GENERATE STAT BOOKS](#).

THE 6-4-3 PLUS APPLICATION SUITE

- Our **WEB APP** offers the highest level of interactive data possible, including the ability to manipulate data, charts, and visualizations for situational-specific scenarios. Get a closer look at this dynamic feature with this short demo: [WEB APP CAPABILITIES](#).
- Our **CUSTOM SPRAYS APP** allows you to create an unlimited number of spray chart template designs with whatever sprays and data you want. Take a look at how easy this is for yourself with this short demo: [CUSTOM SPRAY CHART APPLICATION](#).
- Our **PITCH TRACKING APP** allows you to chart pitch level information for your team and your opponents whether watching games live or recorded. Once charted, you will be able to analyze your charted information and pull this data into Custom Spray Chart Templates. Check out how powerful this new feature can be for your program with this short demo: [VIDEO PITCH TRACKING APPLICATION](#).
