SlowTheGameDown.com

"FOCUS ON THE TASK AT HAND"

NDV Performance training program provides neurodynamic vision education, training and 1:1 consultation support to athletes, coaches and training staff.

Our experience suggests there is not one solution or one tool for your players, but a variety of solutions. We pride ourselves in developing customized programs for each organization with a balance of visual focus, dynamic clarity, visual skills, and visual strategies.

Our training philosophy is built on the premise that the "eyes lead the mind and body". The speed of the modern game requires extraordinary visual capabilities. Without great visual skills, physical mechanics suffer and invariably there is a breakdown in performance. Only a few rare players possess these vast arrays of skills required to get to the next level. Fortunately, those that don't can be trained.

NEW

TRAINING PROTOCOLS

created by **SlowTheGameDown**

NDVPerformance has introduced a new remote vision training platform for coaches and athletes. This system expands access to the 40 years of proven training techniques and tools, usually only available at the NDVPerformance center in Irvine, CA.

The remote platform is an extension of the in-center experience. It provides a convenient way for coaches to add vision training to a comprehensive athlete training program. Our innovative system offers unique distance training program to help develop superior eye-mind-body reactions for improved game-speed performance.

Remote Access

1:1 Custom

Group sessions

All programs are customized to meet organizational budget and time constraints.
