

Full Body & Bat Softball Motion Capture System

3D Softball swing/pitch capture & analysis using only a smartphone/tablet and small wireless sensors on the body & bat

“Using 4D Motion allows me to analyze both myself and my students in detail that cannot be matched even with years of personal experience.”

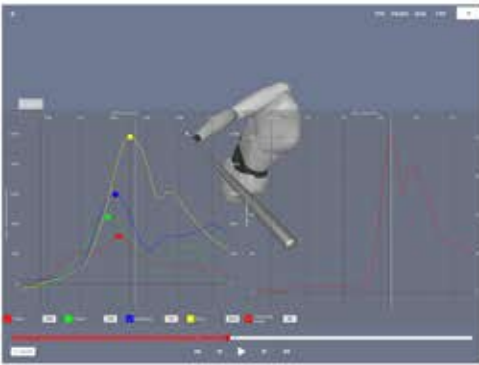

*Sarah Pauly, Professional Athlete
8 Time National Pro Fastpitch All-Pro*

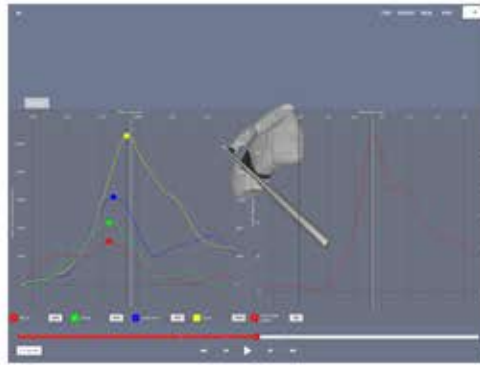

Affordable Portable (indoor/outdoor)
Ready in Minutes Easy to Use

Sample **4DMOTION** Captures

Before - Initial Kinematic Sequence

After - Better Kinematic Sequence
Increased Bat Speed

Pitching Analysis

Sarah Pauly

Professional Athlete

8 Time National Pro Fastpitch All-Pro

"I have used a lot of high speed video analysis in my coaching and competitive career.....4D Motion takes it to another level. It is by far the best new training tool to hit the market!"

Rick Pauly

PaulyGirl Fastpitch

Retired NCAA Division I Pitching Coach

"The 4D Motion body movement capture system will revolutionize how coaches train young ladies to pitch in the fastpitch softball game."

Get Started with 4D Modules!

Modules are smaller components of the full 4D Motion systems that focus on a particular aspect of movement, such as Kinematic Sequence, real time biofeedback, torso speed and stability, or hip interactions. Each module is developed in partnership with a professional coach or industry expert; and includes a video on how to set it up, understand the data provided and drills on how to improve/optimize the movement based on the performance data.

- 1-Sensor Hitting Chest Module
- 2-Sensor Hitting Launch Quickness Module
- 2-Sensor Hitting Kinematic Sequence Torso Module
- 3-Sensor SB Pitching Module – Pitching Position
- 3-Sensor SB Pitching Module – Speed (KS)
- 4-Sensor Hitting Kinematic Sequence Module

Each module is available as a 1-year license
