## Digital Solutions

---

At CompuMail, we endeavor to produce reliable, innovative solutions that provide unmatched value to our clients. Our solutions offer customizable features that uphold the highest industry security compliance standards.

### **Online Letter Archive**

*Gain secure, 24/7 access to your mailed and emailed letters for up to 10 years*

- Receive unlimited letter retrievals and an unlimited amount of users
- Search, locate, and view multiple letters at once
- Easily print, email or save PDF versions of your letters from within the Online Letter Archive portal
- Accessible via web interface or API

### **Email via Secure Hyperlink**

*Send an electronic communication at a fraction of the cost of a physical mail piece*

- Customizable HTML email message body containing a secure hyperlink to a password-protected version of the communication
- Opt-out language is included in the message body
- Receive robust bounce and bad email address reporting
- Eliminates postage fees and increases delivery speed

### **CompuManage**

*Submit and track all letter creation and change requests via our customized client portal*

- Preview letters at any time for a faster, more efficient review and approval process
- Easily approve or reject a letter or batches of letters with one click, with the option to add applicable comments
- Gain the capability to remove letters from review
- Tracks all communication for current and past job task tickets
- Includes internal SLAs that are built-in to ensure tickets are managed in a timely manner
- Provides access to the Online Letter Archive (if using this service)
