

The Best Alternative to U.S. Med Schools

How Trinity Sets Itself Apart

CAAM-HP TOP ACCREDITATION | ECFMG COMPLIANT | NCFMEA ACCREDITATION RECOGNIZED

Early Clinical Experience

Trinity understands the critical nature of a strong clinical foundation, that is why we begin clinical training in the very first term.

- Students participate in weekly rotations, staff health fairs and triage patients at the teaching hospital on the island starting their first term of medical education.
- Students gain valuable global healthcare experience through community outreach.
- Students volunteer on medical missions through the World Pediatric Project.

US Clinical Clerkships

We offer all of our core rotations in one location, where we have partnerships and community affiliations to provide the highest quality clinical education to Trinity students.

- Clinical Transition Term (term 5) in the US where students prepare for the USMLE Step 1 exam and their clinical rotations.
- Students participate in 1:1 preceptor to student rotations which helps build a strong foundation and allows students to form valuable relationships with the preceptors.
- No moving around which avoids unnecessary stress and cost.
- Access to a large student/alumni community and continued support of their fellow students.
- All rotations are scheduled by Trinity staff which means no waiting between rotations and no gaps in rotation schedules for students.

Our Proven Success

Trinity ranks among the very top international medical schools in student outcomes:

87%
Residency
Match Rate

94%
Step 1
Pass Rate

220
Average Score on
Step 1 Exam

We do this by offering small class sizes with a tuition on par with most US public medical schools.

Schedule a campus presentation today and help your students achieve their dreams.
