

An innovative clinical program that will lead the transformation of the pharmacy profession and create the next generation of trusted healthcare advisors.

The PharmD program is accredited by the Accreditation Council for Pharmacy Education. The four-year PharmD degree is a full-time, professional program completed over the course of nine terms.

Our curriculum combines core and elective coursework, along with the introduction of virtual reality (VR) and augmented reality (AR). VR and AR is revolutionizing how we train our students. The didactic and experiential opportunities allow students to augment their training, pursue areas of interest, and/or focus their attention in order to position themselves for post-graduation education, training, or employment. The curriculum is uniquely designed to place emphasis on key areas such as leadership/management, health informatics, geriatric pharmacotherapy and translational pharmacogenomics.

CONCURRENT DEGREES & CONCENTRATIONS

- PHARMD/MASTER OF PUBLIC HEALTH
- PHARMD/MASTER OF BUSINESS ADMINISTRATION
- PHARMD/MASTER OF SCIENCE IN PHARMACEUTICAL NANOTECHNOLOGY
- PHARMACY AND HEALTH EDUCATION CONCENTRATION
