# BELIEVE IN YOUR POTENTIAL

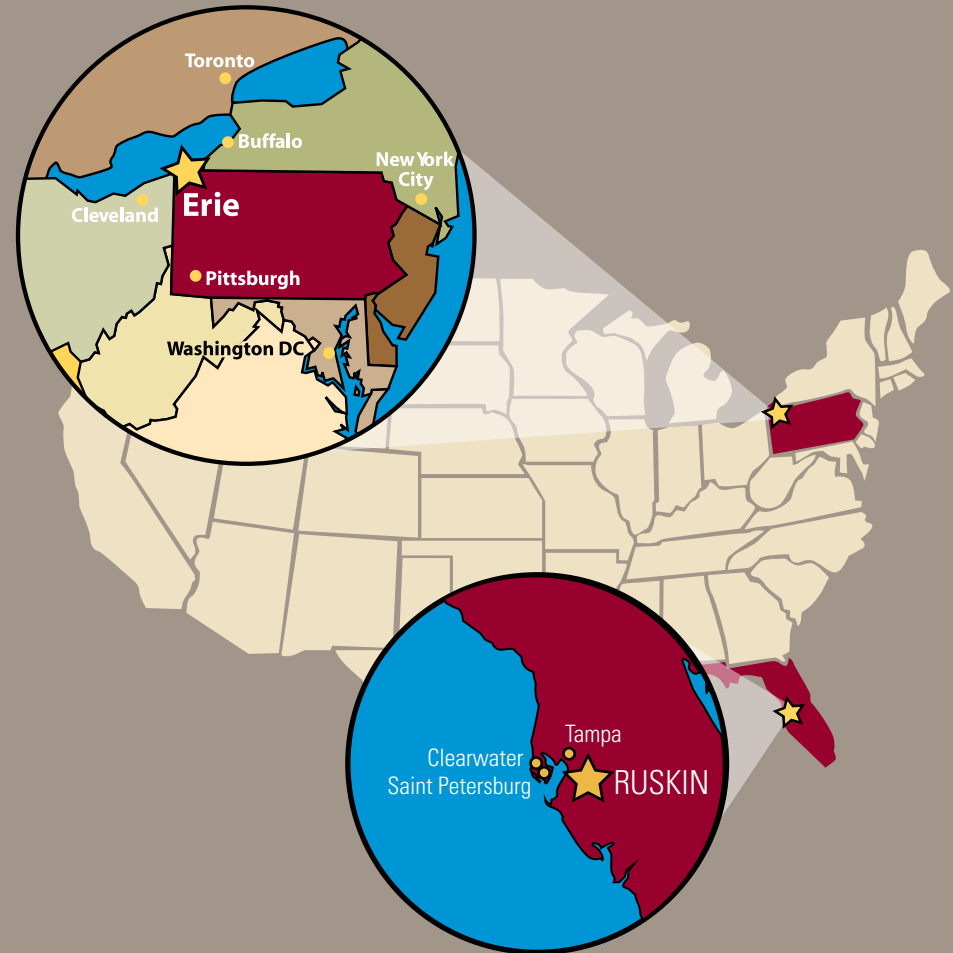

At Gannon, we understand that graduate school can be a balancing act; therefore we offer support and convenience. Our expert faculty can relate to your needs as they remain active participants in research projects, public speaking engagements, clinical practices and business management.

We provide small, intimate class sizes where questions are welcomed and discussions are a key part of our courses. We strive to provide all the resources each student needs to earn her or his degree, and to celebrate success in a current job or a new career.

# LOCATION IS EVERYTHING

Gannon University is comprised of two vibrant campuses. Our first campus is located in the heart of Erie, Pennsylvania. This location enables students to easily find internships and co-op jobs with federal, state, and local government agencies; accounting, law, and marketing firms; hospitals; industrial and insurance companies and museums. Students tell us Erie is just the right size—big enough to provide plenty of professional and recreational opportunities, but small enough to easily get to places and feel secure.

Our second campus is located in Ruskin, on the west coast of Florida. The hands-on, community-based curriculum offered at our Ruskin campus prepares you to meet an increasing demand for high-quality graduate education in disciplines that serve the healthcare sector of the Florida economy.

# ADVANCE YOUR CAREER

Our master's and doctoral degrees are designed to help professionals meet national standards and stay ahead of expected job trends. Expand your career potential with degree options offered in any of our three colleges.

## COLLEGE OF ENGINEERING AND BUSINESS

The College of Engineering and Business prepares our students to be leaders by teaching theory, problem-solving skills, and socially responsible decision-making. Our students and faculty collaborate with external organizations in design projects, internships, and research projects to promote excellence in education, practical knowledge, and life-long learning.
