If you are attending more than two days, you will need to register at the full conference rate. Registration is required to attend SIG meetings. You may register for the Tuesday day rate if you only plan to attend the SIG meetings.

<input type="checkbox"/> Non-Member Registration One Day Monday	\$400.00
<input type="checkbox"/> Non-Member Registration One Day Tuesday	\$400.00
<input type="checkbox"/> Non-Member Registration One Day Wednesday	\$400.00
<input type="checkbox"/> Non-Member Registration One Day Thursday	\$400.00
<input type="checkbox"/> Non-Member Registration One Day Friday	\$400.00

ABLS Courses

The **ABLS Course** is for physicians, nurses, physicians assistants, nurse practitioners, therapists, paramedics, and all burn care professionals caring for a burn patient within the first 24 hours of burn injury. Following a series of lectures, case studies are presented for group discussions. You will be given the opportunity to work with a simulated burn patient to reinforce the assessment, stabilization, and the American Burn Association transfer criteria to a Burn Center. Final testing consists of a written exam and a practical assessment.

The **ABLS Instructor Course** is for physicians, nurses, physician assistants, and nurse practitioners. A prerequisite is successful completion of an ABLS Course. Instructors should have: (1) demonstrated experience in providing burn care; (2) an interest in the content of the course and the process of teaching; and (3) a commitment to serve as a faculty member for the ABLS courses. Following a lecture on "Teaching How to Teach," you will present a five-minute mini-lecture on an assigned topic, lead a group discussion of case studies, and a patient assessment stabilization scenario.

The **ABLS Coordinator session** will take place at the conclusion of the ABLS Instructor course. This is an optional question and answer session for attendees that are interested in coordinating an ABLS course.

You can register for the Advanced Burn Life Support (ABLS) courses in addition to your daily events, but you may also register for ABLS only.

Tuesday, March 17, 7:30am – 4:00pm | \$250.00 |

Acute Burn Care Course

The Acute Burn Care Course is targeted to early career providers. It is a hands-on, simulation course introducing the clinical skills required to assess and manage common complications in adult and pediatric patients with burn injuries. Skills such as wound management, skin substitute selection and placement and escharotomy will be taught.

The goal of the course is to improve the standard of burn care by educating providers with a need-driven curriculum that addresses common deficiencies in burn care as identified in a national multidisciplinary needs assessment. The course is not intended to serve as a substitute for burn fellowship training or situations that require clinical reasoning beyond the scope of today's content. It is the expectation that providers that participate in the course will gain an understanding and an introduction to the clinical skills required to assess and manage common complications in adult and pediatric patients with burn injuries.

Point of Care Ultrasound for the Burn Care Provider

Point of Care Ultrasound (POCUS) is a useful diagnostic technique in the care of critically-ill patients. This all-day session is an entry-level course on bedside heart and lung ultrasonography and is designed for physicians, advanced practice critical care nurses, and physician-assistants. A pre-course, on-line teaching module will introduce participants to basic POCUS principles and how to obtain and visualize standard cardiac and lung images. The session will be run by several experienced anesthesiologist instructors and will be restricted to the first 20 registrants to ensure close small group teaching. Short didactic sessions will be followed by much longer hands-on image acquisition and assessment of global heart function, intra-vascular volume status, valvular activity, and identification of pericardial effusions. Following lunch (included), we will delve into lung ultrasound, with a focus on assessment of atelectasis, pleural effusions and ARDS. A post-course assessment of new POCUS skills will be offered at the end of the day.

Please note, if this course does not reach minimum class size by January 15, 2020, the ABA reserves the right to cancel the course.

Select the Courses, Sessions & Events You Wish to Attend

Please select which sessions you plan to attend to aid in planning. Please note the following sessions are included with your Annual Meeting registration and are not ticketed. Registering for these sessions does not guarantee seating. Seating is provided on a first-come, first-serve basis until the meeting room is full. The American Burn Association reserves the right to restrict access to any session that is full to prevent overcrowding in the meeting room. Standing against walls in session rooms is not allowed.
