

**NATUREFORMER**  
KFT 90 SPEED

# Natural fiber packaging!

New material competence

Primary fibers are suitable for **food** packaging like fruits, cookies, chocolate and much more. Applications include packaging and **lids** for takeaway **beverages** such as coffee cups are also as well as containers for ready-to-eat meals and soups. There is also great potential in **advanced packaging** of electronic goods like smartphones. Furthermore, the **agriculture** sector has a great demand for e.g. flower pots and propagation trays.

**The NATUREFORMER KFT 90 Speed produces premium packaging with the highest surface quality** to achieve the hygienic standards of the foodstuffs, **pharma and cosmetics industry**.

## Your benefits

- Innovative Fiber Thermoforming with pre-pressing
- High efficiency servo-driven engines
- Fast and easy tool change
- Integrated automation modules: inspection, stacking, sleeving etc.

Main benefits at a glance:

Solution Provider

Single source: fiber preparation unit, machine configuration with integrated vacuum system, fiber tools, HMI 2.0

Automation

Cost benefits through automatic sorting/tilting/boxing/sleeving and quality control

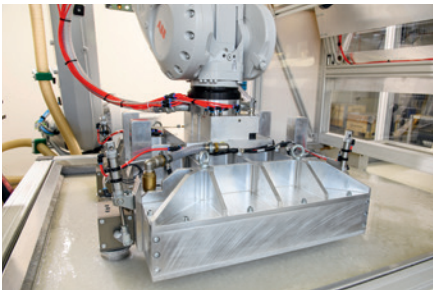

Machine Availability

Reduced downtime due to tool inspection and tool change positions and pre-heating unit for the hot-press toolset

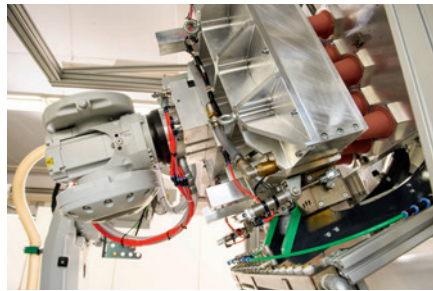

Product Quality

Highest product quality and narrow tolerances to safeguard existing automatic up- & downstream processes

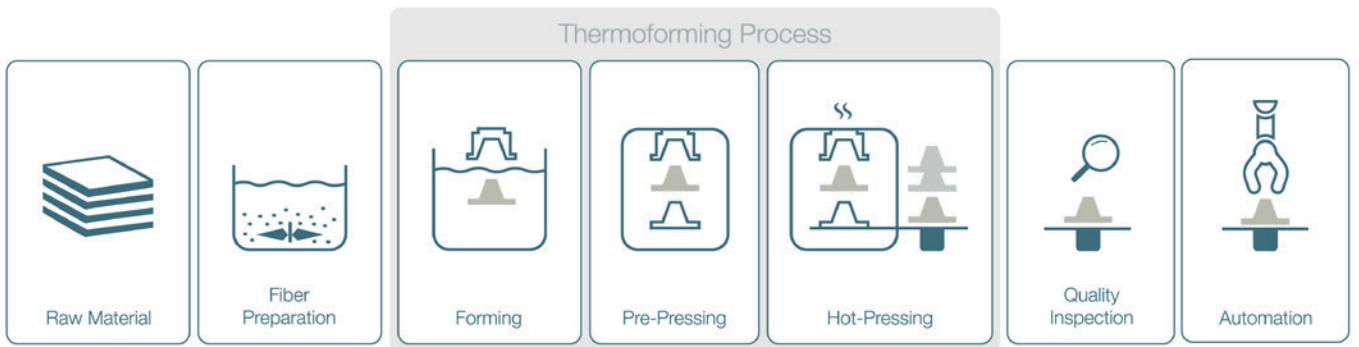

Repeatable suction process

Flexible robot-driven movement

Easy access for tool inspection

Technical data

Forming area	900 x 600 mm / 35,43 x 23,62 in
Maximum height of formed part	900 x 600 mm / 35,43 x 23,62 in
Punching force	600 kN
Shot weight max.	900 x 600 mm / 35,43 x 23,62 in
Cycle time	15 sec (referred to our reference product)
