

## Who is Medivest?

Medivest is a leading provider of Medicare Secondary Payer (MSP) compliance solutions to the workers' compensation and general liability industry. We are a persistent innovator, creating solutions that address a variety of MSP and settlement issues. Medivest offers a wide array of products and services that make it the most competent and comprehensive source for MSP compliance solutions in the industry.

## Over Two Decades of Experience

Medivest was the first company to professionally administer a Medicare Set-Aside Arrangement and has been providing this service to the workers' compensation and liability industry since 1996, longer than anyone else. Our founding partner comes from the structured settlement industry and is a strong advocate of structured settlements. Because of this we have been making it a priority for our services to compliment structured settlements for over 20 years.

This experience and familiarity is not just limited to our founders. Medivest employees have an average tenure of 8 years, ensuring that our clients and members always work with a knowledgeable professional.

## Providing a Personal Touch

All cases are different and Medivest ensures that each one gets the individual attention it needs. Medivest utilizes state-of-the-art proprietary software for fund management, fiduciary accounting, and bill review and couples that with personal attention from a trained customer service representative assigned to their account. Additionally, Medivest has been a privately held company since its inception with zero venture capital. You can always be assured that our primary interests are with you and not an outside group.
