

**“I couldn't
do what I
do without
AgCode.”**

– Marshall Edwards
SHAW VINEYARDS

Since AgCode's inception in 2003, our software solutions have been built according to the needs of our customers. From citrus and nut growers to vineyard managers, AgCode is an incredible tool set for a variety of specialty crops. Here's a snapshot of how our software can work for you:

-  **Collect & streamline your data**
-  **Improve employee efficiency**
-  **Reduce your costs with accurate data**

In Their Own Words

Our customers have plenty to say about their AgCode experience (and we couldn't have said it better):

"It's allowed us to grow – to increase the number of employees we have, pieces of equipment – to plan how we're going to do things, and to best utilize what we own currently."

– Jason Donoho, Pina Vineyard Management

"AgCode is striving to create the possible solutions that will get the farmers out of the office and back into the field."

– Victor Faraco, Sebastian Farms

"We can see on the fly where we are on a daily basis, next to our budget. AgCode has been a huge help in organizing and managing our workflow."

– Jeff Baccus, Joseph Phelps Vineyards

"AgCode is great and efficient. I highly recommend it to all growers."

– Carly Faulk, Viticulturalist
