

## 1. Know costs, plan smarter.

Use on any device, create reports, and get insights on where to lower your costs and improve work organization.

## 2. Treat with confidence.

Avoid the outbreaks of downy and powdery mildews, botrytis, and other pests. Protect your vines while spraying less.

# Vineyard management software

## 3. Reduce administration.

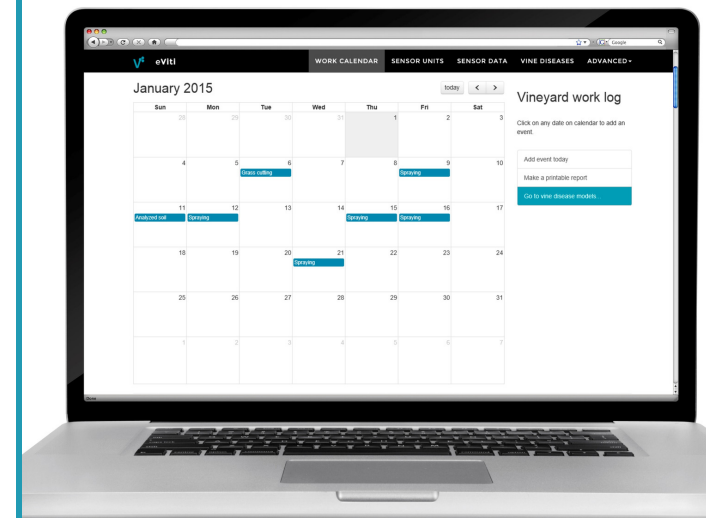

Cut administration by up to 80%. Have your worklog done automatically, manage your workforce and track performance easily.

## 4. Irrigate for quality.

Precisely irrigate to grow desired quality grapes. Save water by avoiding water runoff.

## 5. Connect sensors and controllers.

eVineyard supports easy to deploy soil moisture sensors, weather stations, and irrigation controllers.

## 6. Understand better.

Use sensor data in eVineyard's irrigation and pest development models to understand processes in your vineyard.
