

PROCESS2WINE ADOPT INNOVATION

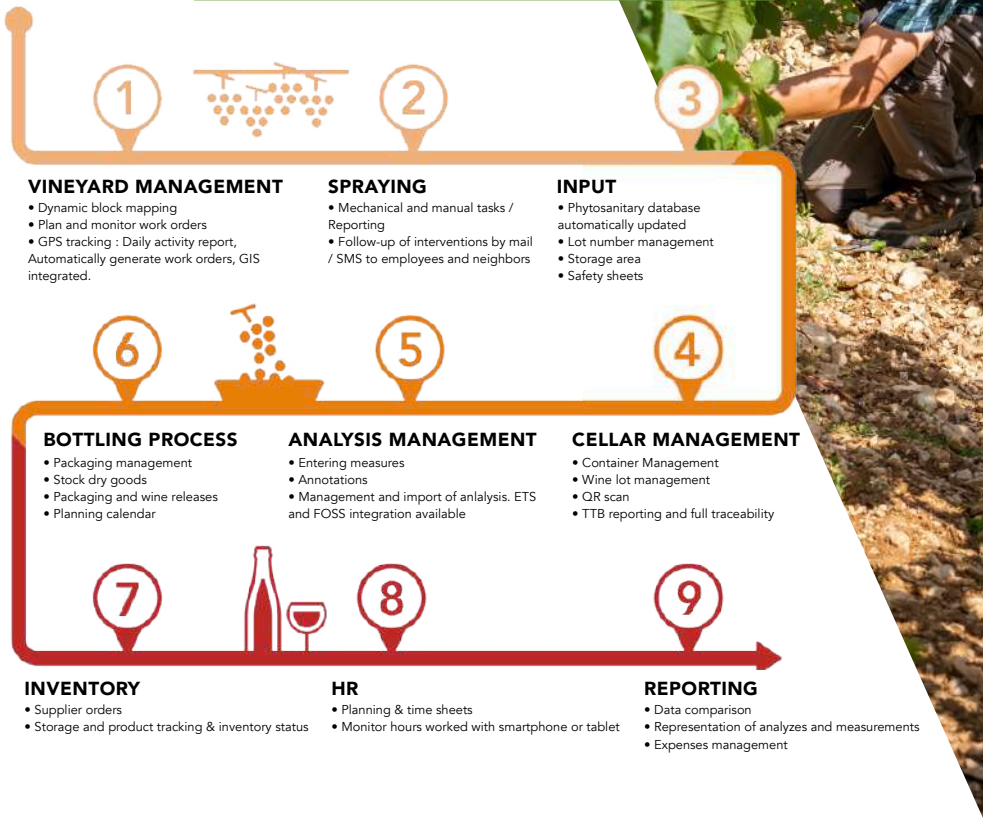

It's time to move away from paper-based systems and non-intuitive software!

PROCESS2WINE is a cloud-based software accessible on any device connected to the internet with intuitive and rapid interfaces.

A QUICK AND SIMPLE PLATFORM

- Full Web Software
- One common platform for every employee
- Mobile application
- Multi-site connection
- Low operating costs

DESIGNED FOR THE WINE INDUSTRY BY A TEAM THAT UNDERSTANDS YOUR DAILY WORK

PROCESS2WINE ADVANTAGES

MOBILE INTERFACE

Designed for smartphones and tablets. This is an easy, intuitive and quick way to enter data and follow-up in real time wherever you are.

COMPREHENSIVE TRACEABILITY REPORTS

Plan, organize and monitor all harvest operations. Follow-up each action performed on each block and wine lots.

GPS TRACKING

Automatic activity monitoring, geolocation monitoring of vineyard work, which automatically generates daily work reports by employees, block and type of work.

REPORTING & COMPLIANCE

Performance indicators which help to anticipate, monitor and manage operations and production costs. The module also gathers the data and prefills the TTB report.

SAVE TIME, MANAGE YOUR COSTS
AND OPTIMIZE YOUR WORKFLOW
