

SINCE 1994 LEADING IN HARVEST YIELD,
PLANTS SPARING AND OPERATIONAL CAPABILITY

Effective
**VIBRATING
SYSTEM**

longwise shaking-
and cross shaking
device automatic
conveyor device

**ADJUSTABLE
BUNDLING DEVICE**

all versions

are available for single-row
or double-row harvesting

**OWN OIL SUPPLY SYSTEM
IN ALL
HYDRAULIC MODELS**

**SINGLE-ROWED UP
TO 40.000
PLANTS/HOUR ***

*depending on the distance
for planting the vines

**DOUBLE-ROWED UP
TO 70.000
PLANTS/HOUR ***

*depending on the distance
for planting the vines

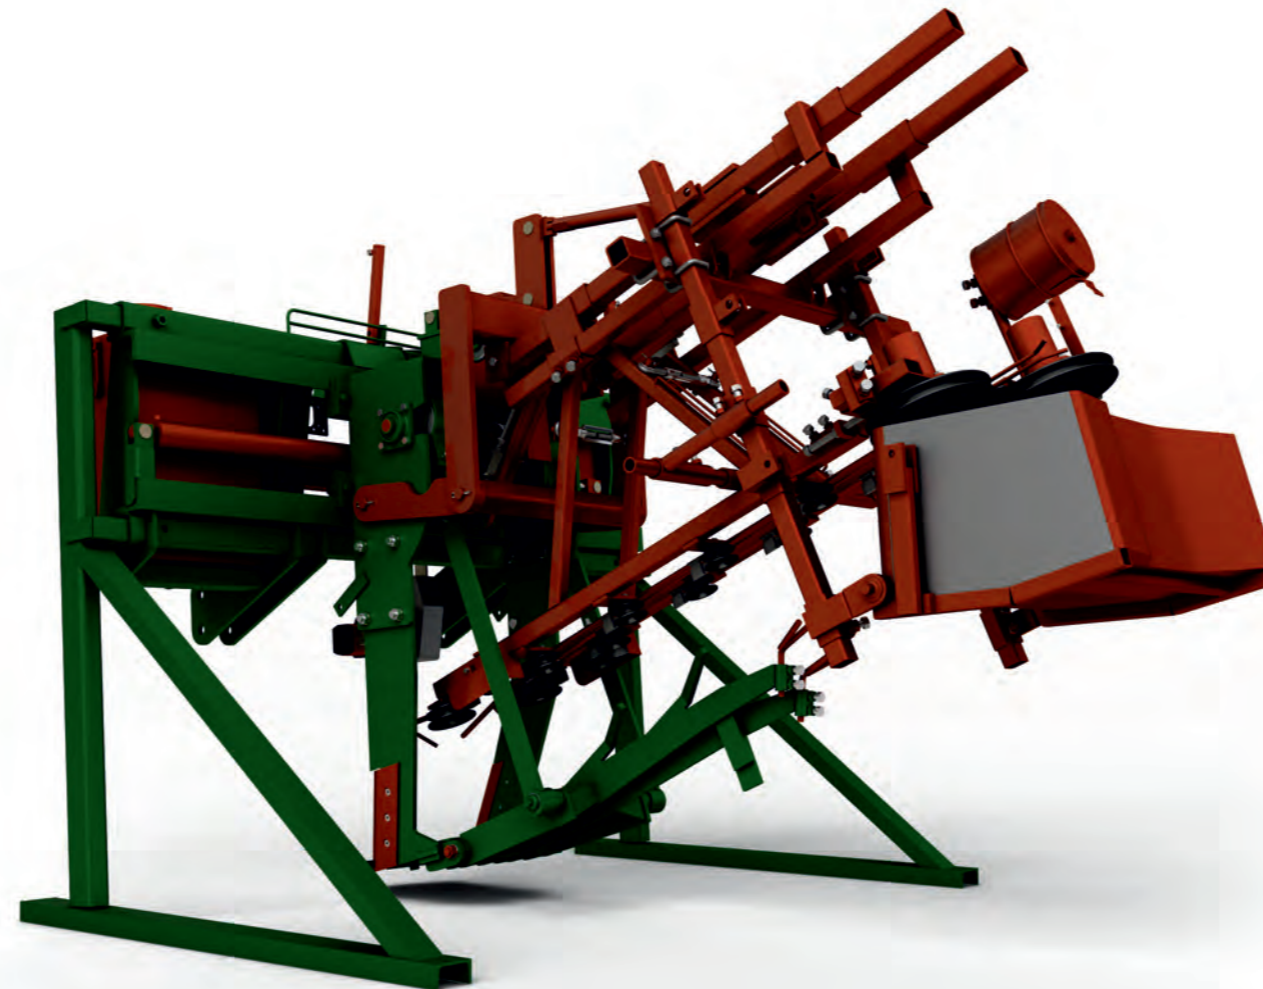

**FOR HARVESTING
OF VINES OR
SIMILAR CROPS /
HORSERADISH**

We individually manufacture the machines according to your wishes. Please feel free to contact us.

WAGNER' HELPFUL PLANT LIFTER
FOR ROOTING OUT THE VINES

**PLANT LIFTER D1
WITH HANDLING DEVICE**

Technische Daten und Maßangaben sind annähernd und unverbindlich. Technische Änderungen vorbehalten.

**FUTHER OPTIONS
FOR YOUR EFFECTIVE
PLANT LIFTER**

**Hydraulic cross
shaking device**

**INCREASES THE CLEANING
PERFORMANCE OF THE
ROOTS**

**WITH VIDEO EYE
for the tractor driver**

**COLTER FOR USE
IN TIGHT ROWS TO CUT
THROUGH THE LATERAL
ROOTS**

**ELECTROHYDRAULIC
CONTROL PANEL
for the tractor driver**

Technical features
of the plant lifter

In combination with the automatic control with which the plant lifter runs along the rows by itself it is the most efficient machine on the market with bundling device for harvesting vines or similar plants.

- > PTO shaft pump for 540 rpm, with own oil supply system, tank appr. 150 liters
- > Drives for shaking bars, conveyor device, hydraulic cross shaking device and automatic bundling device by hydraulic motor
- > For plants from 10 cm to 70 cm in length above ground level
- > For tractors from 66 kW 4WD

**Wagner plant lifter
for your requirements**

Our plant lifter are also suitable for fruit production and Christmas tree cultures.

Model B1 / B2

- > Mechanical model
- > Cardan shaft drive for vibrating device
- > Side shifting device on both sides: 50 cm
- > Perfect adaptation to the course of the series

Model C1 / C2

- > Hydraulic model
- > Hydraulic drive for the shaking device
- > especially quiet and gentle way of working

Model D1 / D2

- > Hydraulic model
- > Almost identical in construction to the "Model C"
- > In addition a bundling device with every related mounting- and drive-adjustments is included

We develop and produce
in-house.
