KEY FEATURES

INTERIOR FINISH: Speidel tanks feature an ultra-smooth 2R interior surface which effectively resists the build-up of tartarate residues. Clean your tanks with cold water after cold stabilization! Say goodbye to harsh cleaning chemicals and expensive CIP systems!

WELD QUALITY: Speidel's laser welders create flawless stainless to stainless junctions that look and feel more like a taped fabric seam than a traditional weld. Ultra high-quality welds leave no chance for residual product to harbor spoilage organisms.

WARRANTY: Speidel backs up each and every tank with an industry-leading 25 year warranty against defects in materials or workmanship. And, as a 5th generation manufacturer, you can be confident they'll be around to honor that warranty should the need arise.

ORDERING TANKS

Speidel tanks are custom made to order and can be configured with a variety of options and accessories. Start by selecting a base tank style as pictured to the above, then select the available "add-ons" for the base tank you have chosen. Examples of some options are listed on the back of this pamphlet.

PLEASE NOTE: Custom tanks take several months to build and ship, orders need to be placed by March 31st to ensure delivery before harvest.
