

CORK & CAPSULE

Our Cork Products

The unique organic properties and sustainability of cork make it an ideal choice for wine closure. The Lafitte Cork line produces a range of natural, agglomerated, or capsule cork stoppers that are customized to suit your specific preferences and the aging qualities of your wine. Our experienced sales team works in partnership with you to select the highest quality cork product to best meet your needs.

Our Quality Promise

The quality of our cork production is a direct result of continuing efforts to improve our procedures and products while respecting the norms and regulations associated with the products.

Lafitte is committed to continually evolving with the development of new technology, product options, and quality control measures. Our understanding and control of TCA in natural cork has continually improved through a commitment to research and development of new sensory-based quality control methods.

Natural Cork

Natural corks of the highest grade, made from only the best quality cork oak and subjected to rigorous quality control to ensure top performance.

Standard Dimensions

Diameter: 24 mm
