

H2O Engineering is a Certified Minority Business Enterprise creating tailored water treatment solutions for drinking water, process water, water reuse and groundwater remediation. We take pride in manufacturing systems with state of the art technologies, superior components and industry leading automation and control logic – creating an extremely reliable and cost-effective solution. We build life-long relationships with our customers through service and support delivering results for the lifetime of the technology.

Pure Water

We will help you test your water and determine the optimal advanced filtration, separation or disinfection solution for your needs. We can help you create pure and ultrapure water as well as minimize your brine generation and discharge challenges.

Clean World

Our Clean World team designs, manufactures and installs complete ozone generation and delivery systems for remediation of petroleum and solvent contaminated soil. Our industry-leading control system, Intelo-zone®, maximizes system uptime for optimal remediation results, saving time and money.

Markets we specialize in:

Indoor Agriculture

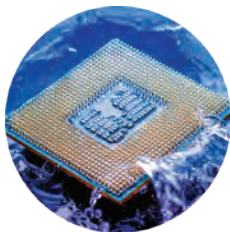

Remediation

Wine

Brewery

Ultrapure Water

Industrial

Manufacturing

Our Process

1. Water and System Audit

2. Tailored Solution Design

3. Solution Integration and Automation

4. Equipment Delivery and Commissioning

5. Lifetime Service and Support

Our Products

- Mobile ozone remediation solutions
- Industry-specific disinfection and reuse solutions
- Full portfolio of water filtration solutions including RO systems
- Electrodeionization (EDI/EDR)
- Membrane antiscalant chemistry
- CIP chemistry
- Indoor Agriculture water purification and reuse

Our Solutions

- Disinfection
- Filtration
- Reuse
- In-Situ and Ex-Situ Remediation
- Purification
- Color and Odor Removal

Our Services

- Tailored design and engineering
- Capable field service and training
- Robust equipment rentals and lease options
- System automation and controls
- UL 508A panel fabrication
- CA Contractor License #790167

Example of our Ozone Disinfection System designed for the Indoor Agriculture market.

We are certified by the following agencies:

Southern California
Minority Supplier
Development Council

Pure Water. Clean World.
