

CoxReels® with Continental Professional Hose
Built for the Toughest Environment – Your Shop

CoxReels®

Featuring Continental Hybrid and Rubber Air Hoses

Professional-Grade
Hybrid Air Hose

Application

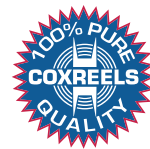

Continental's premium built hybrid air and water hose is designed for a wide range of industrial, construction and agricultural applications. When it's combined with CoxReels, you get a best-in-class hose management solution that's an industry first.

Features

- › Continental Professional-Grade Hybrid Hose 3/8" x 50' 300 PSI WP 3/8" NPT
- › Premium TPE compounding - ARPM Class B oil resistance and non-marking
- › Extremely lightweight design for low drag resistance
- › Superior flexibility in cold weather, with ability to handle temperatures between -40°F to 158°F (-40°C to 70°C)
- › High quality heavy duty steel construction with patented powder coating finish for unmatched durability
- › Heavy duty spun disc with rolled edges for greater strength
- › All components made in USA

Hybrid Air Hose is ideal for repetitive applications including:

- › Bench Applications
- › Residential Garages
- › Hose Shops
- › Manufacturing/Assembly Facilities
- › Automotive Repair/Maintenance Operations

Professional-Grade Rubber Air Hose

Application

Industrial, agricultural and construction sites need a hose that can stand up to harsh environments. That's Continental's Professional-Grade Rubber air and water hose combined with CoxReels best-in-class hose management solution.

Rubber Air Hose is ideal for abrasive applications including:

- › Service Trucks
- › Hose Shops
- › Machine Shops
- › Manufacturing Plants
- › Maintenance, Repair & Operations

Features

- › Continental Professional-Grade Rubber Hose 3/8" x 50' 300 PSI WP 1/4" NPT
- › Premium rubber compounding - ARPM Class C oil resistance and abrasion resistance
- › Built for professional use
- › Superior flexibility in cold weather, with ability to handle temperatures between -40°F to 210°F (-40°C to 99°C)
- › High quality heavy duty steel construction with patented powder coating finish for unmatched durability
- › Heavy duty spun disc with rolled edges for greater strength
- › All components made in USA
