

FOOD & BEVERAGE

Cheers to your financial health.

Your financial picture can be as inspiring — and unpredictable — as your craft. Conditions that create a great success can, with the slightest variation, cause your offerings to fall flat the next time. We can help you gain more control over your financial future and free you to focus on what makes your business so rewarding and unique.

We get involved. Confession: We love what you do. We support the food and beverage business at all levels, from home brewing and judicious sipping to date-nights at our favorite local restaurants.

You can always expect us to:

- Show understanding of and respect for your craft
- Ensure you receive all of the credits and deductions for which you qualify
- Help you develop systems and controls that will allow you to focus on your goals
- Serve as your advisors and strategists
- Analyze your cash flow projections
- Help you identify your most profitable products and services to maximize profits
- Share industry best-practices

We can help you with:

- Accounting method changes
- Assurance services (financial audit, review & compilation)
- Bookkeeping services
- Capital expansion planning
- Consulting on equitable ownership structures
- Ensuring tax compliance for related party structures
- Federal, state and local tax incentives (Tips credits, R&D credit)
- Hop and vineyard farm accounting methods
- Inventory costing
- Vineyard development strategic planning
- Optimizing the use of industry-specific software
- Bookkeeping
- Contract controller services
- CFO consultation
- Excise tax compliance
