

A fully integrated **remote** and **real-time** solution for **smart monitoring** the **winemaking** process

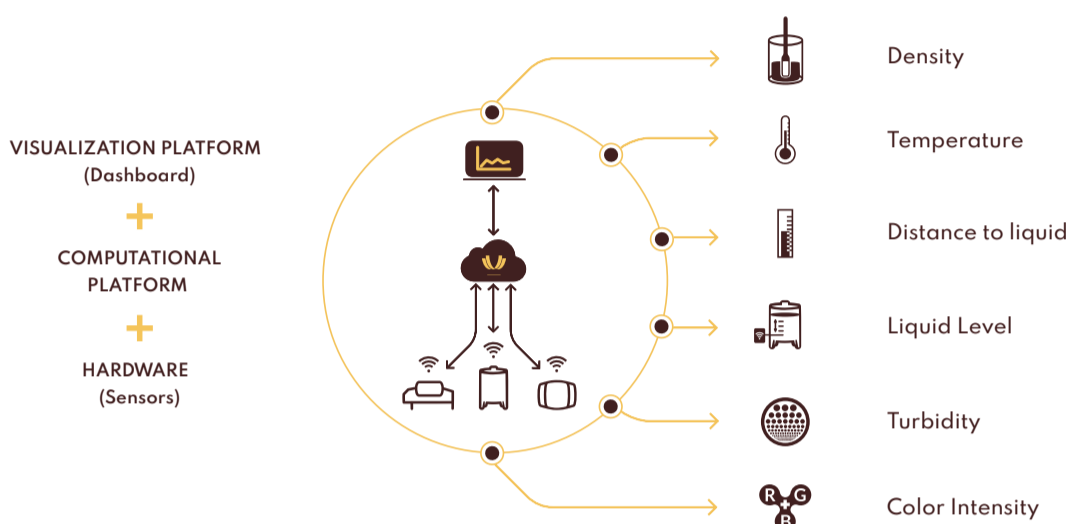

winegrid
Smart Oenology

MULTIPARAMETER MONITORING

Monitoring fermentation, until recently, was mostly a manual, reactive and time-consuming process. With WINEGRID it becomes a remote, real-time, proactive and predictive process.

3 SIMPLE STEPS

to help drive the wine production precisely as you want by using WINEGRID's sensing solutions

1. INSTALL
2. CONNECT
3. MONITOR
