Digital Printing, Extrafit®

Digital Printing

Digital printing technology offers top-quality printing, intense colors and great reproducibility for even the most elaborate designs. You can reproduce distinctive landscapes, portraits and high resolution artwork, which is usually not affordable with the rotogravure printing.

Foils and polylam capsules printed with digital printing allows to forge a special relationship with client by incorporating variable data or by printing targeted messages on the front and back of the foil. Each foil becomes unique. It gives flexibility and responsiveness for ultra-individualized small series. Enter the world of digital printing for foil and access to the ultra-customization!

Extrafit®

Are you looking for a solution to securely fix the sparkling foils to the glass surface of the bottle? Ask for Extrafit® sparkling foils.

Extrafit® is able to offer a perfect and clean look, without blemishes.
No possibility to remove the sparkling foil after the application.
No rotation of the capsule.
Anti-tampering solution.
Perfect look.
