

Wonderful nurseries™

GROW WITH CONFIDENCE AND 100% TESTING FROM WONDERFUL NURSERIES

DISCOVER THE VALUE OF WONDERFUL NURSERIES' 100% TESTING PROGRAM

Test Before You Plant! At Wonderful Nurseries, our commitment to 100% tested plant material can save you significant dollars on your investment. Our own [Wonderful Laboratories](#), the **ONLY ISO-certified grapevine virus testing lab in North America**, ensures the most thorough screening protocol in the industry.

Lab Processes Based on FPS Protocol - Wonderful Laboratories follows strict testing protocols established by Foundation Plant Services (FPS) at the University of California Davis. Every step is conducted in a different room to avoid cross contamination, and negative and positive air pressurization ensures additional layers of protection.

Research Tells the Story - We recently collaborated with the University of California Davis on an extensive research article, detailing the clear benefits of virus screening for grapevines in California. Literature we studied estimated yield reductions of at least 30% or more, due to viruses in infected vines. Simply rogueing and replacing vines is not the solution since beginning with clean plant material has shown to be more cost effective.

Take Advantage of a \$90 Million Value - Every grower should consider screening to be an essential service. In a recent study it is estimated that the total potential value of virus screenings statewide to be approximately \$90 million per year... nearly 2% of the estimated annual production value of the California grape industry! To see the complete research article on grapevine testing, visit [Virus Screening for California Grapevines](#).

Contact Us for "Growers First" Service - Discover all that has made Wonderful Nurseries the largest and most trusted grapevine nursery in North America. Call today - (661) 758-4777 - for more information about our 100% testing program and give more value to every vine you grow!
