Wildeye – What We Do for Wine and Grape industry

Who We Are

- New Zealand based company with offices in New Zealand, Australia and California. In business since 2003.
- We manufacture data loggers and telemetry systems and provide easy to use, configure and understand software solutions to present field data.
- All of our systems are cellular based and work anywhere in the world. No need to purchase any additional infrastructure, licenses or communication packages.
- Our systems are rugged, waterproof, field proven and built to last with over 50,000 working installations worldwide.

Wildeye Unified Wine and Grape Symposium
