

We are glad that you have taken a few minutes to discover more about us. We are a grapevine nursery ready to tackle head-on the emerging viruses and diseases that threaten the health of the plant, and the entire industry. We are committed to producing the strongest, cleanest plants for you, our grower.

**ROOTED IN TRADITION. FAMILY OWNED. FAMILY OPERATED.**

Eckhard Kaesekamp is no stranger to the grapevine industry. With over 25 years of experience in the ins and outs of a nursery business, his knowledge helps grow truly strong, healthy plants. His international experience has lead him to combine the best methods and techniques to produce a seamless and efficient approach to producing great plants.

*"True success comes only when every generation continues to develop the next generation." John Maxwell*

With over 15 years of hands-on experience, Benjamin Kaesekamp's philosophy combines time-tested traditional vine growing techniques and the best of modern approaches to achieve the goal of a healthy, strong plant for your future. His commitment to customer service, affable personality, and experience make him the go-to person for your questions and concerns related to young vines.

**LOCATION, LOCATION, LOCATION**

Isolation is the key ingredient to insure that our products stay free of the viruses and diseases that are so common in grapevines.

We are located in Northern California approximately 30 minutes north of Sacramento Airport. Yuba County is an ideal place to produce healthy, strong vines. We have great water sources, good soils, and moderate temperatures.

**WE HAVE WHAT YOU NEED**

We offer growers an exceptional selection of grape varieties, clones and rootstock as dormant bench grafts, and potted green vines.

## Virus Testing Process

**1** Select healthy vines

**2** Take samples from EVERY PLANT

**3** Send samples for lab testing

**4** Receive lab results

**5** Perform grafting

In 2014, we began testing each individual plant to ensure a clean, high quality vine to establish your vineyard. This is unique from most of our competitors, who only test a sampling of vines. We've developed these strict, individual testing processes in a way that adds a cost of only about 25 cents per plant. This thorough, transparent process is a big difference between our independent family-owned nursery and large corporate nurseries.
