Your information for fast and easy orders:

Press Model: _____

Serial Number: _____

SPARE PARTS

DOOR SEALS

Door Seals / Door Membranes

Most failures of a press can be patched up or passed by with stopgap measures, but not a burst door seal...

We have access to all door seals for all press brands.

TRANSMISSIONS

Sprockets, Chain Wheels & Rollerchains

It is crucial that roller chains fit correctly. Misaligned chain wheels cause premature wear and breakage.

BEARINGS, BUSHINGS, SEALS

Lip Seals and O-Rings

Maintaining proper seals is the basic way to keep far more expensive parts, like bushings and shafts, from becoming damaged which leads to breakdowns.

PINCH VALVES, SPARE SLEEVES

Spare Sleeve for Pinch Valves

We stock all sizes: DN 40 - DN 150

Flange Sleeves, Quick Vent Valves, Pilot Valves

BLOWERS, REVERSING UNITS, MUFFLERS

Vacuum Blowers

Usually the first victim of a leaking membrane will be Vacuum Blowers. We service all kinds of blowers, from old belt driven to modern side-channel blowers with reversing units.

For efficiency and greater performance, you might consider upgrading your press with a larger blower, which will help provide a higher rate supply of low pressure air.

VALVES, SOLENOIDS, CHECK VALVES

Pneumatic and Electric Components

The tiniest parts cause the most untraceable problems:

A stuck sniffer valve may make your membranes last only HALF AS LONG as usual. A five dollar spring could save you thousands.

PRESSURE GAUGES & SENSORS

We can source the most unusual and special parts, and if not, we can find an affordable alternative, ready to be shipped.

Ask Revo Press Parts First!

We have supplied the wine industry with high quality handcrafted membranes to fit all major manufacturers, models and sizes of pneumatic presses.

Our membranes are constructed of highly resistant materials offering superior durability and flexibility, featuring specially formulated material bound to a proprietary woven fiber matrix.

Utilizing high frequency welded seams and design reinforcements, our membranes have earned an outstanding reputation for strength, fit and economics for our customers.

Our membranes have a slick surface on the product side, with no welding reliefs and no stitches, providing exceptional ease of sanitation and a perfect seal.

UPGRADES

UNIVERSAL PLC CONTROLS & UPGRADES FOR PRESSES

Pre-Harvest Press Check

The pneumatic press is the key component to a successful harvest. Any disruption in the performance of this single piece of machinery can significantly impact your crush operation costs as well as the resulting yield and quality of the processed grapes.

Revolution Press Parts & Service has trained technicians prepared to perform pre-harvest inspections, preventive maintenance, and make repair/service recommendations.

Order your Pre-Harvest Press Check sooner than later! Contact us today.
