

Quote for Casella Family Brands

Laura Mallamace

Please don't hesitate to contact me by phone +491752656137 or by mail kilian.moser@oculyze.de if you have any questions.

Kilian L. Moser

Just so you know:

- + the **results** of our device are **comparable** with those obtained using a **hemocytometer**
- + our device **does not require** a laboratory **microscope** or **trained staff**
- + it is **faster** than the alternatives due to the **automated measurement** and **analysis**

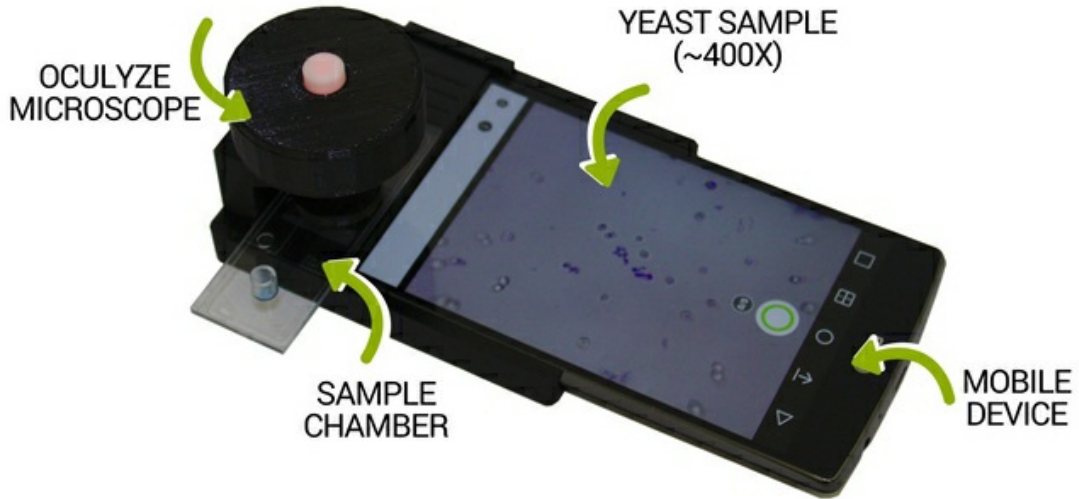

Not convinced yet? You can read the whole external validation of the system by the **Versuchs- und Lehranstalt für Brauerei (VLB)** here: oculyze.de/validation

OCULYZE

better brewing

OCULYZE MICROSCOPE

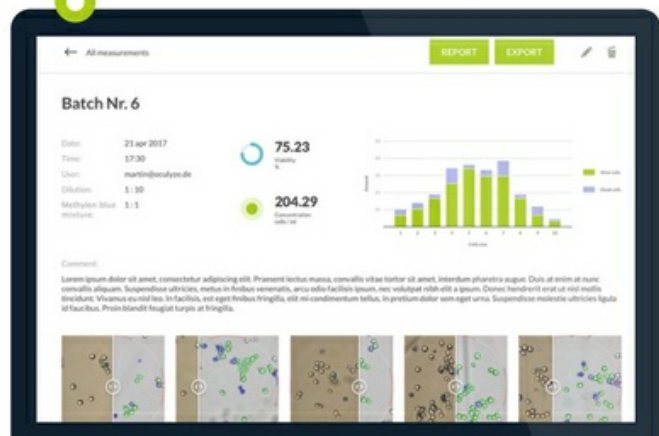

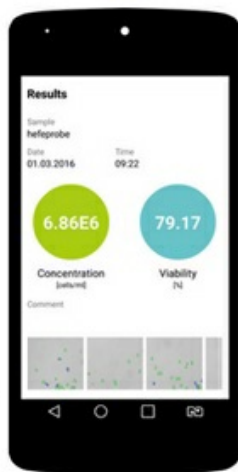

our mobile microscope has a magnification of ~400x and allows you to measure your yeast from anywhere you want

IMAGE RECOGNITION

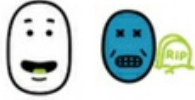

our image recognition software performs automatic cell concentration and viability analysis for you in one measurement, in less than one minute

IN THE CLOUD

our encrypted cloud storage gives you access to your images and results from any device connected to a network

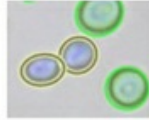

≡ FEATURES ≡

Concentration & Viability

We analyze the same volume as in a counting chamber but are 10 times faster and have no human error. Yeast viability is determined by differentiating live and dead cells with methylene blue staining.

Precise Automatic Analysis

An integrated separation of clumped cells allows for a more accurate analysis; budding cells are automatically identified and provided as a separate value.

Automatic Storage & Results History

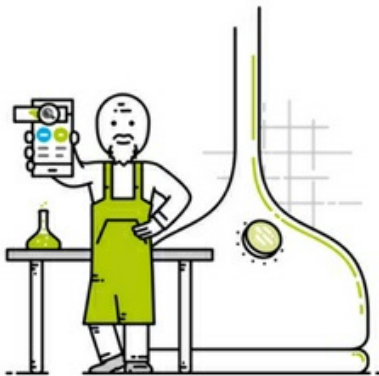

Our data management system allows you to access all of your yeast concentration & viability results. Review your analysis history from anywhere, anytime.

Web Application & Customization

View and analyze your measurements from any connected device. The web app allows you to generate customized reports, view historical data, track yeast over time & more.

≡ REPITCHING ≡

Repitching your yeast has several advantages when done right. Taste often improves after the first use but more importantly, you can reduce your dry yeast costs! Checking your yeast for concentration and viability before repitching can save you between \$8 and \$13 per hectoliter. A smaller brewery that brews about 1000 hectoliters per year can save about \$8000 on dry yeast costs alone!

Oculyze - Better Brewing Pricing

All packages below include the following items:

• Oculyze microscope	• LG G4 Smartphone	• Sample chambers	• Plastic syringes
• Measuring cylinder	• Methylene blue	• Pasteur pipettes	• Reaction containers
• Cleaning bellows	• Cleaning cotton swabs	• Cleaning cloths	• Transport box

Special Offers <small>(*only available for new customers)</small>	Payment (USD)	QTY	Subtotal
1. Prepaid 1000 Prepay for 1000 analysis and get the microscope for free. Analysis don't expire. \$1.99 per analysis after the 1000th analysis.	\$1,999.00	1	\$1,999.00
2. Prepaid Unlimited Prepay unlimited analysis for 12 months and get the microscope for free. \$169 per month after the first 12 months.	\$1,999.00	0	\$0.00
3. Monthly Payment Plan 12 monthly payments of \$199 for unlimited analysis during this period. Includes the microscope.	\$199.00	0	\$0.00

Subtotal **\$1,999.00**

Total \$1,999.00

Basic Packages	Payment (USD)	QTY	Subtotal
4. Pay Per Analysis Includes the microscope plus 50 analysis. Each additional analysis is \$1.99. One time payment plus monthly billing for additional analyses.	\$1,399.00	0	\$0.00
5. Monthly Flat Includes the microscope plus your first month of unlimited analysis. \$169 for every month thereafter.	\$1,468.00	0	\$0.00

Subtotal **\$0.00**

Total \$0.00
