

## MODULAR LABELING

Michael Meyer- North Central RSM

# MANTOVA ITALY HEADQUARTER

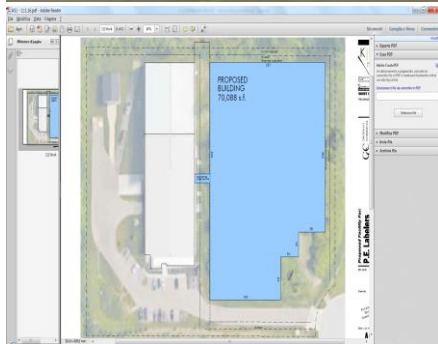

Q3 2018 ended 4500sqm new offices building  
Q1 2020 17.000sqm for new production facility

USA

Corona, CA

Cincinnati, OH

# A Full-Service Operation

## Centered on customer support

- 24/7 customer support
- Project management
- Field service support
- Inside technical support & remote access
- Spare parts inventory & order fulfillment
- Change parts design and manufacturing
- Change parts cart manufacturing
- Stock labeler program: configuration, finishing & acceptance testing

# USA Stock Labeler Program

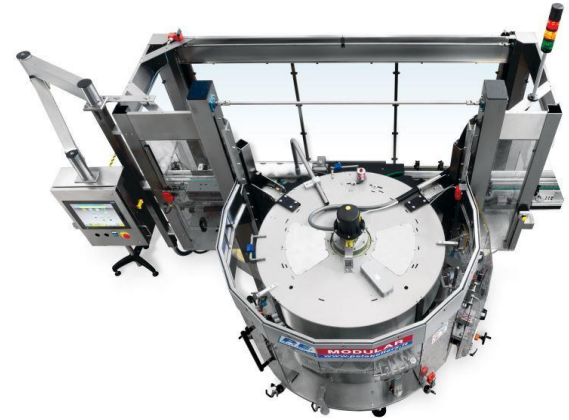

## Quick ship configurable labelers

- **Modular Plus SL5 & SL7 pressure sensitive labelers**
- **Labelers configured, finished and tested at P.E. USA**
- **8-10 week lead time from receipt of P.O. & container / label information**
- **Labeler FATs can be in person at P.E. USA or by video**

# Modular Labeling

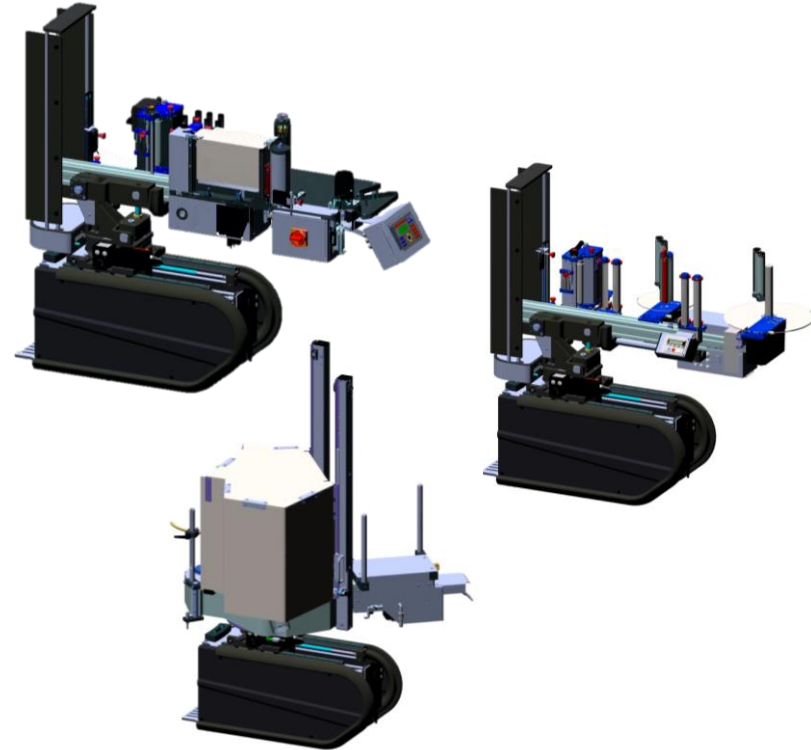

- **Models for speeds up to 72,000 bph**
- **Machine with an electronic cam, with transmission with programmable bottle plates**
- **Labeling applicators on modules installed on modular carts**
- **Possible combinations for cold glue, pressure sensitive and hot glue applications**
- **Maximum Flexibility**

## Features & Benefits:

1. Starting from a unique body machine (different diameters available, from to 576 up to 2320) it's possible adding and combining it with independent self-adhesive, cold glue and hot melt stations, available through carts or fixed bob.

*The live demo first shows the introduction of two self-adhesive stations (different measures, from 90 to 140) and one cold glue group on the new fixed support (BOB – SLB).*

## Features & Benefits:

**2. Total flexibility in changing the stations:** you can choose other stations and add them both through carts or fixed bob, ideal for any labelling technologies you need.

Your needs and requirements are always satisfied, even your labelling demands change in time.

*The live demo first shows the introduction of two self-adhesive stations (different measures, from 90 to 140) and one cold glue group on the new kart (SLK).*

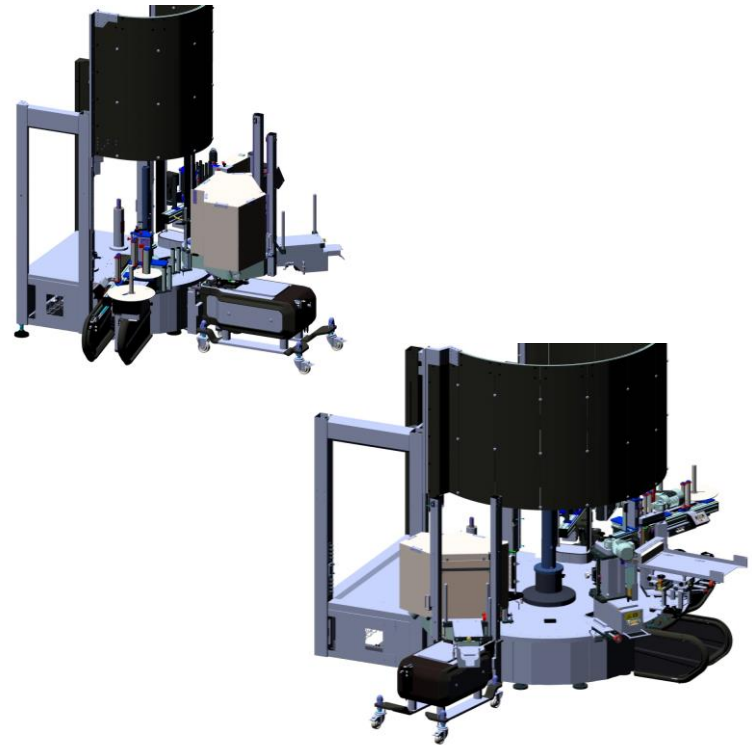

## Features & Benefits:

**3. Total flexibility in changing the original body machine with another more suitable, keeping the same stations and groups previously bought.**

You can add and combine other stations or group in a second moment, on the base of your needs.

*The live demo shows the body machine change with a bigger one and the introduction of an additional hot melt station.*

## Features & Benefits:

**4. The revolutionary production system** developed by P.E. represents a completely innovative method, which guarantees:

- ❖ optimization of production processes;
- ❖ 8 weeks reduction in delivery times.
