

Purchasing workers' compensation insurance and making premium payment installments can be a time-consuming hassle. Most plans have installment fees, a large, upfront deposit, advance payments based on estimated payrolls and the continual concern of making timely payments. All of these issues can tie up vital cash resources that could be used elsewhere. Also, because your payments are calculated on estimated payroll rather than actual payroll, you risk having to make time-consuming adjustments for inaccurate payment amounts at audit.

California Payroll's Workers' Comp Connect, changes all that. Workers' Comp Connect integrates seamlessly with your Pay-As-You-Go Workers' Compensation carrier to ensure that your premium payments are accurate and on time. Payments are calculated on actual payroll so you pay no upfront deposit. Your premiums are calculated as they are earned, and then automatically transmitted to your insurance carrier. By integrating your Workers' Comp payments with payroll, you take the guesswork out of calculating premium payments, and reduce administrative time and expenses. No more large down payments, no more checks to write; just pay what is owed each pay period based on actual payroll!

COMPONENTS	TRADITIONAL METHODS	PAY-AS-YOU-GO
Down Payment	Up to 25% down payment required	Zero Down
Payment Type	Estimated based on payroll predictions	Accurate payments based on actual payroll
Premium Payment Schedule	Paid monthly quarterly or annually	Paid bi-weekly or monthly
Finance Charges	Yes	No
Late Fees	Yes, may apply	No
Post Audit Adjustments	Potential costly adjustments if payroll underestimated	No surprises
