## INTRODUCING AGCODE PASSIVE

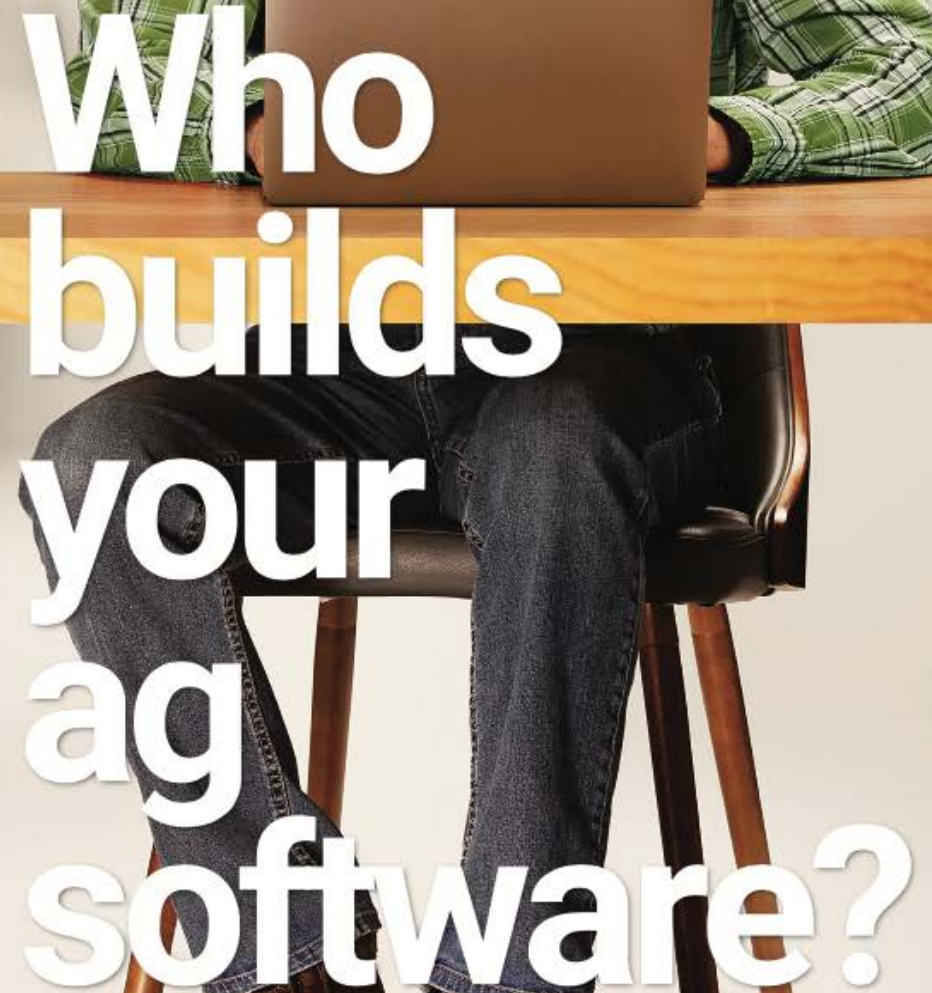

With our newest feature, the data does the work so you can do yours.

- Track equipment and labor activities with GIS devices while they happen
- Monitor block completion on a daily basis
- Gain a clear view of productivity levels and efficiency
- Load seamlessly into your AgCode system

*All without any manual input from you or your team.*

[agcode.com](http://agcode.com)

A person wearing a green and white plaid shirt, blue jeans, and brown work boots is sitting on a black chair at a wooden table. They are using a laptop. The floor around their feet is covered in soil, suggesting a farm or agricultural setting. The text 'Who builds your ag software?' is overlaid in large white letters on the image.

# Who builds your ag software?

Farm raised and launched in 2003, AgCode provides specialty crop growers with the industry's most powerful software solution. From our unrivaled payroll and labor tools to the newly launched AgCode Passive, our tailored systems go deeper than the data to empower your decisions with our team of pros to guide you along the way.

 **Get a clear, unified overview of your operation**

 **Experience your most efficient seasons ever**

 **Cut through the numbers to gain the information you need most**
